About Me

- I am a **highly skilled Backend & AI Architect** with over **8 years of experience** in designing and implementing **scalable, high-performance** systems that drive business growth and automation. My expertise lies in **AI, Cloud Infrastructure, API Integrations, and Backend Engineering**, helping businesses transform with **intelligent automation and cloud-native solutions**.
- I specialize in **AI & NLP-powered Chatbots** – Automating customer engagement with advanced AI-driven conversations.
- **Scalable Cloud Architecture** – Building resilient, high-availability systems with AWS, microservices, and DevOps best practices.
- **Backend Optimization** – Ensuring speed, security, and reliability in backend development.
- **Twilio & API Integrations** – Enabling seamless voice, messaging, and chatbot solutions.

Core Skills & Technologies

Programming Languages

- Python
- JavaScript
- Node.js
- PHP

Backend

- FastAPI
- Flask
- Express.js
- NestJS

Frontend

- React.js
- Next.js
- Angular

AI Technologies

- Generative AI
- Large Language Models (LLMs)
- Retrieval-Augmented Generation (RAG)
- AI Agents
- Multi-Agent Systems
- AI Chatbots
- AI Voice Agents
- AI Workflow Automation
- Prompt Engineering
- Fine-tuning
- Function Calling
- Tool Calling
- AI Memory Management
- Semantic Search
- Vector Search
- AI Copilots

AI Frameworks

- LangChain
- LangGraph
- LlamaIndex
- CrewAI
- AutoGen
- OpenAI Agents SDK

AI & Large Language Models

- OpenAI
- Anthropic Claude
- Google Gemini
- Meta Llama
- Mistral AI
- Hugging Face
- FastChat
- Llama.cpp
- oobabooga

Cloud & DevOps

- AWS
- Docker
- GitHub Actions
- GitLab CI/CD
- Nginx
- PM2
- Linux
- SSL
- Load Balancing
- Auto Scaling

Databases

- PostgreSQL
- MongoDB
- MySQL
- Redis
- Firebase
- SQLite
- DynamoDB
- DocumentDB

API & Integration

- REST API
- GraphQL
- SOAP
- Webhooks
- Microservices

Vector Databases

- Pinecone
- Weaviate
- ChromaDB
- FAISS
- Milvus
- Qdrant
- PostgreSQL (pgvector)

Real-Time Communication

- WebSockets
- Socket.IO
- Server-Sent Events (SSE)

Chatbot & Conversational AI

- Botpress
- Dialogflow
- Amazon Lex
- Microsoft Azure Bot
- IBM Watson
- RASA
- BotKit
- FlowXO
- ManyChat
- Chatfuel

Communication Platforms

- Twilio
- Chatwoot
- WhatsApp
- Telegram
- Slack
- Facebook Messenger
- Google Assistant
- Skype
- Viber

My Portfolio

HWS (Health Wealth Safe)

Features:

- Comprehensive healthcare platform for managing patient records, EMR, and billing
- Real-time communication via chat and video (Twilio, Jitsi)
- Patients can book appointments, store documents, and chat with doctors
- Doctors & staff can access patient records, conduct video consultations

HWS Patient App

HWS Staff App

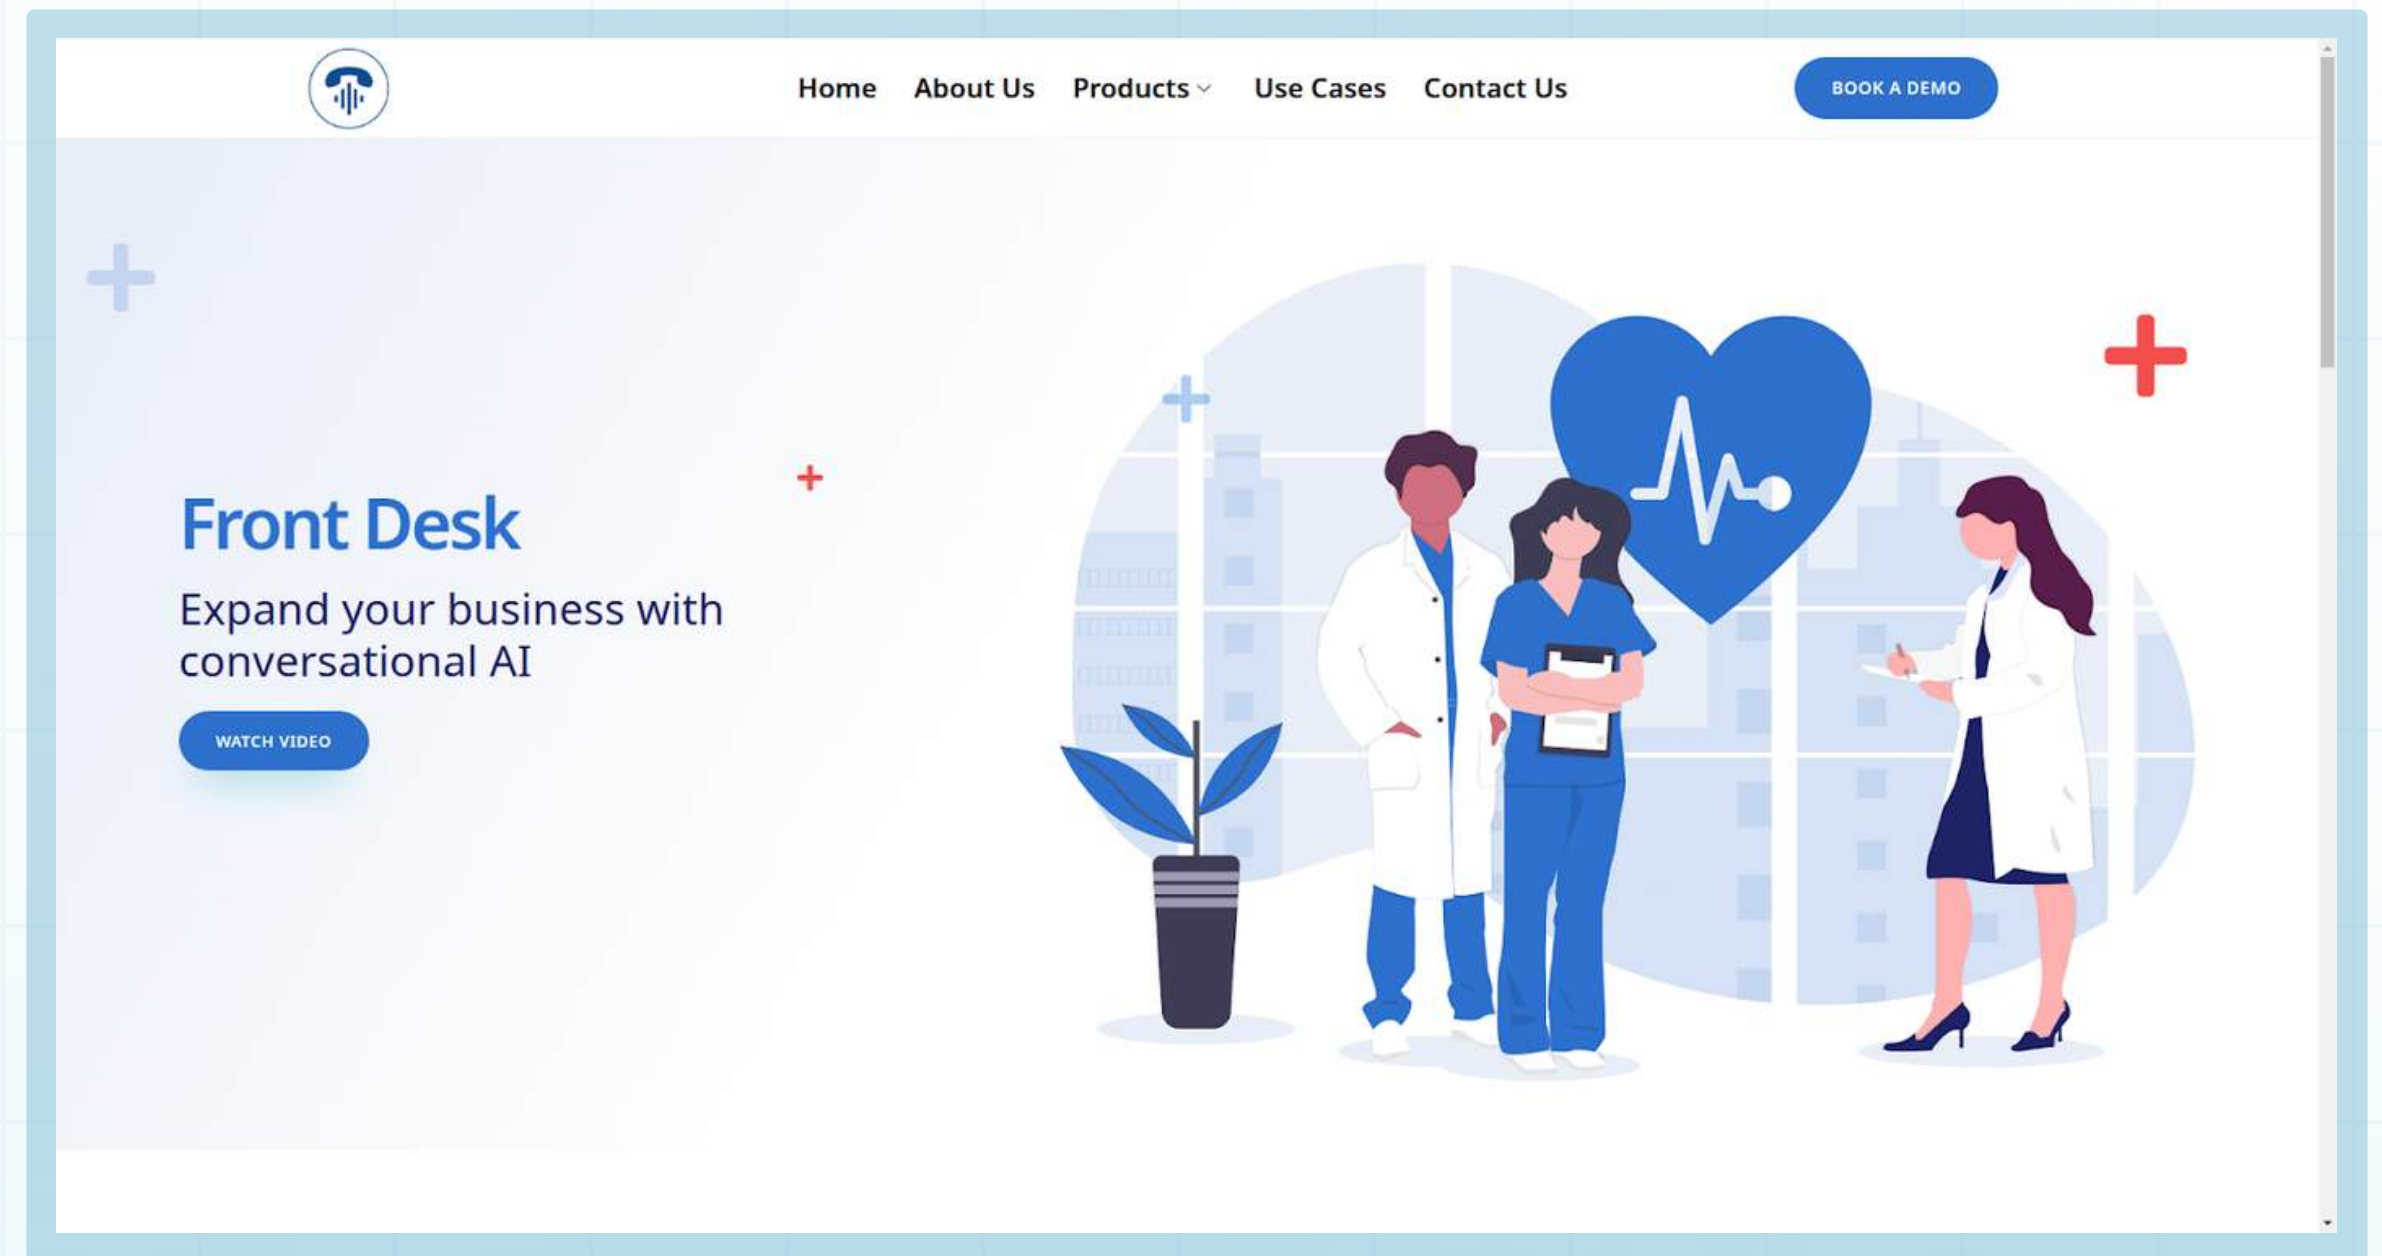

FrontDesk Clinic – AI-Powered Healthcare Automation

Features:

- Automates appointment scheduling and sends reminders to patients.
- Allows patients to refill prescriptions and receive lab result notifications.
- Verifies insurance details and processes claims easily.
- AI-powered virtual assistant answers patient queries and streamlines onboarding.

Link:

- <https://frontdesk.clinic/>

VetWise

Features:

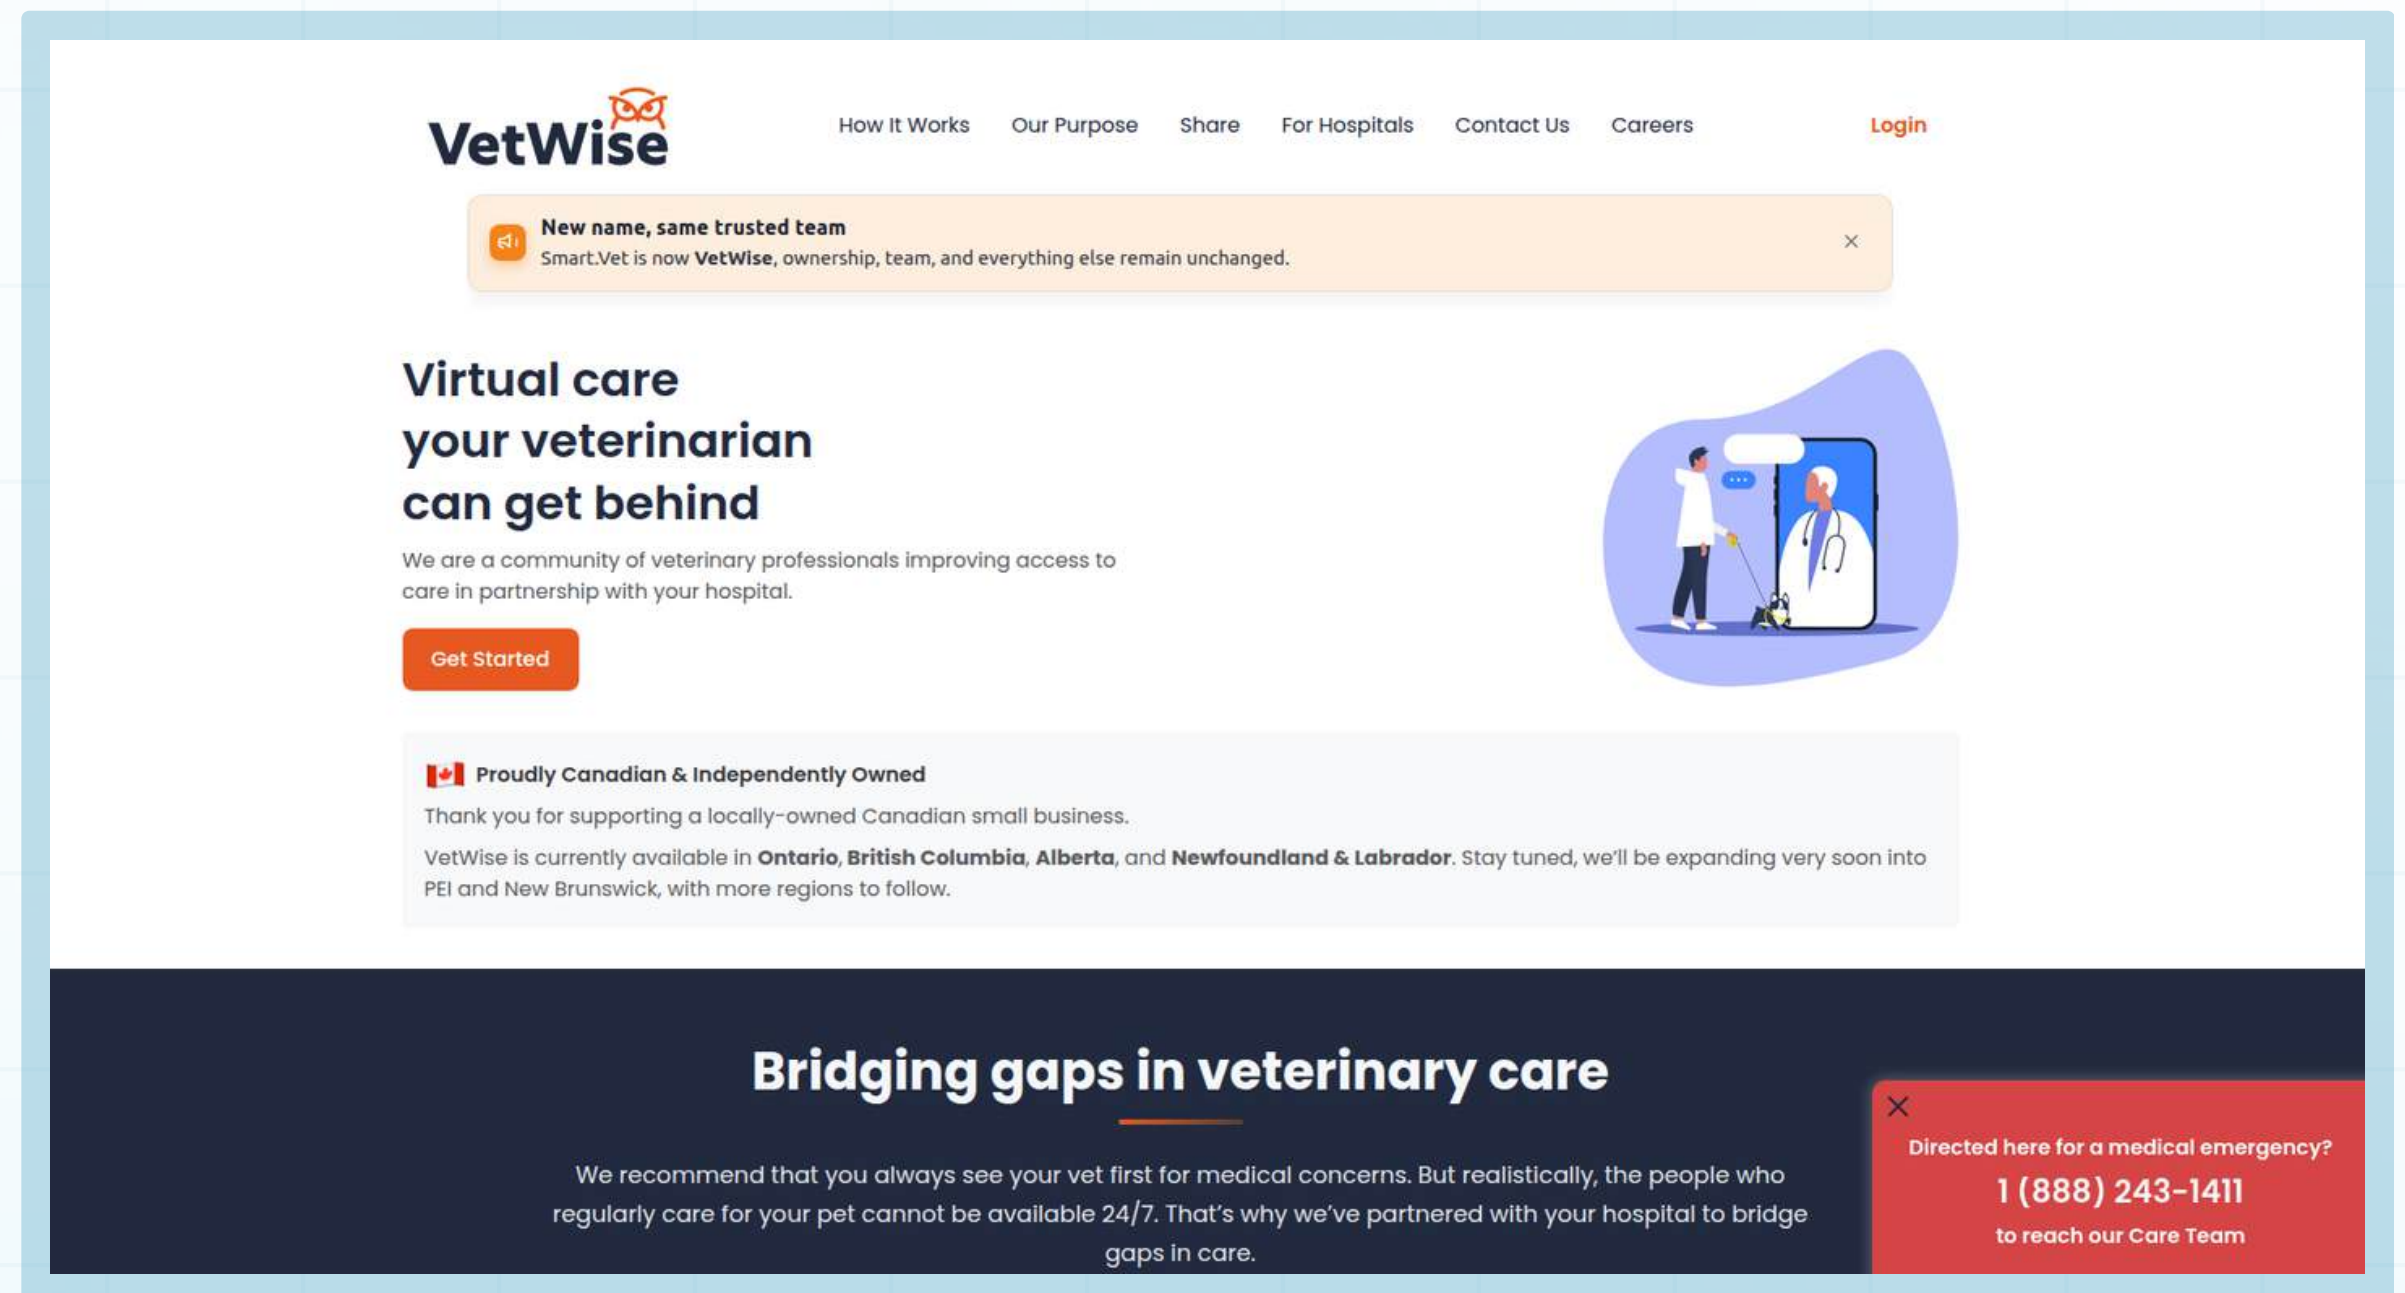

- Offers 24/7 virtual veterinary consultations across Canada.
- Easy 3-step booking: select service, complete booking, meet a vet.

Technology Stack:

- Frontend: React.js
- Backend: Node.js, Python
- Database: PostgreSQL, MongoDB, Redis
- Cloud Infrastructure: AWS Cloud for scalable hosting, storage, and video streaming capabilities

Link:

- <https://getvetwise.com/>

MOF Frontdesk AI portal

Features:

- AI Agent for Appointment Booking
- Book, Cancel & Reschedule via AI
- Call Logs, Transcriptions & Chat
- Manage Appointment Status from Panel
- Customizable Agent Voice
- Twilio Number Purchase

Technology Stack:

- Frontend: React.js
- Backend: Node.js
- Database: PostgreSQL
- AI Stack: OpenAI
- Cloud : AWS
- 3rd Party: Twilio Integration

Link:

- <https://ai-uat.medicalofficeforce.co/login>

AIVA Chat – Voice Chatbot & Embeddable Widget Platform

Features:

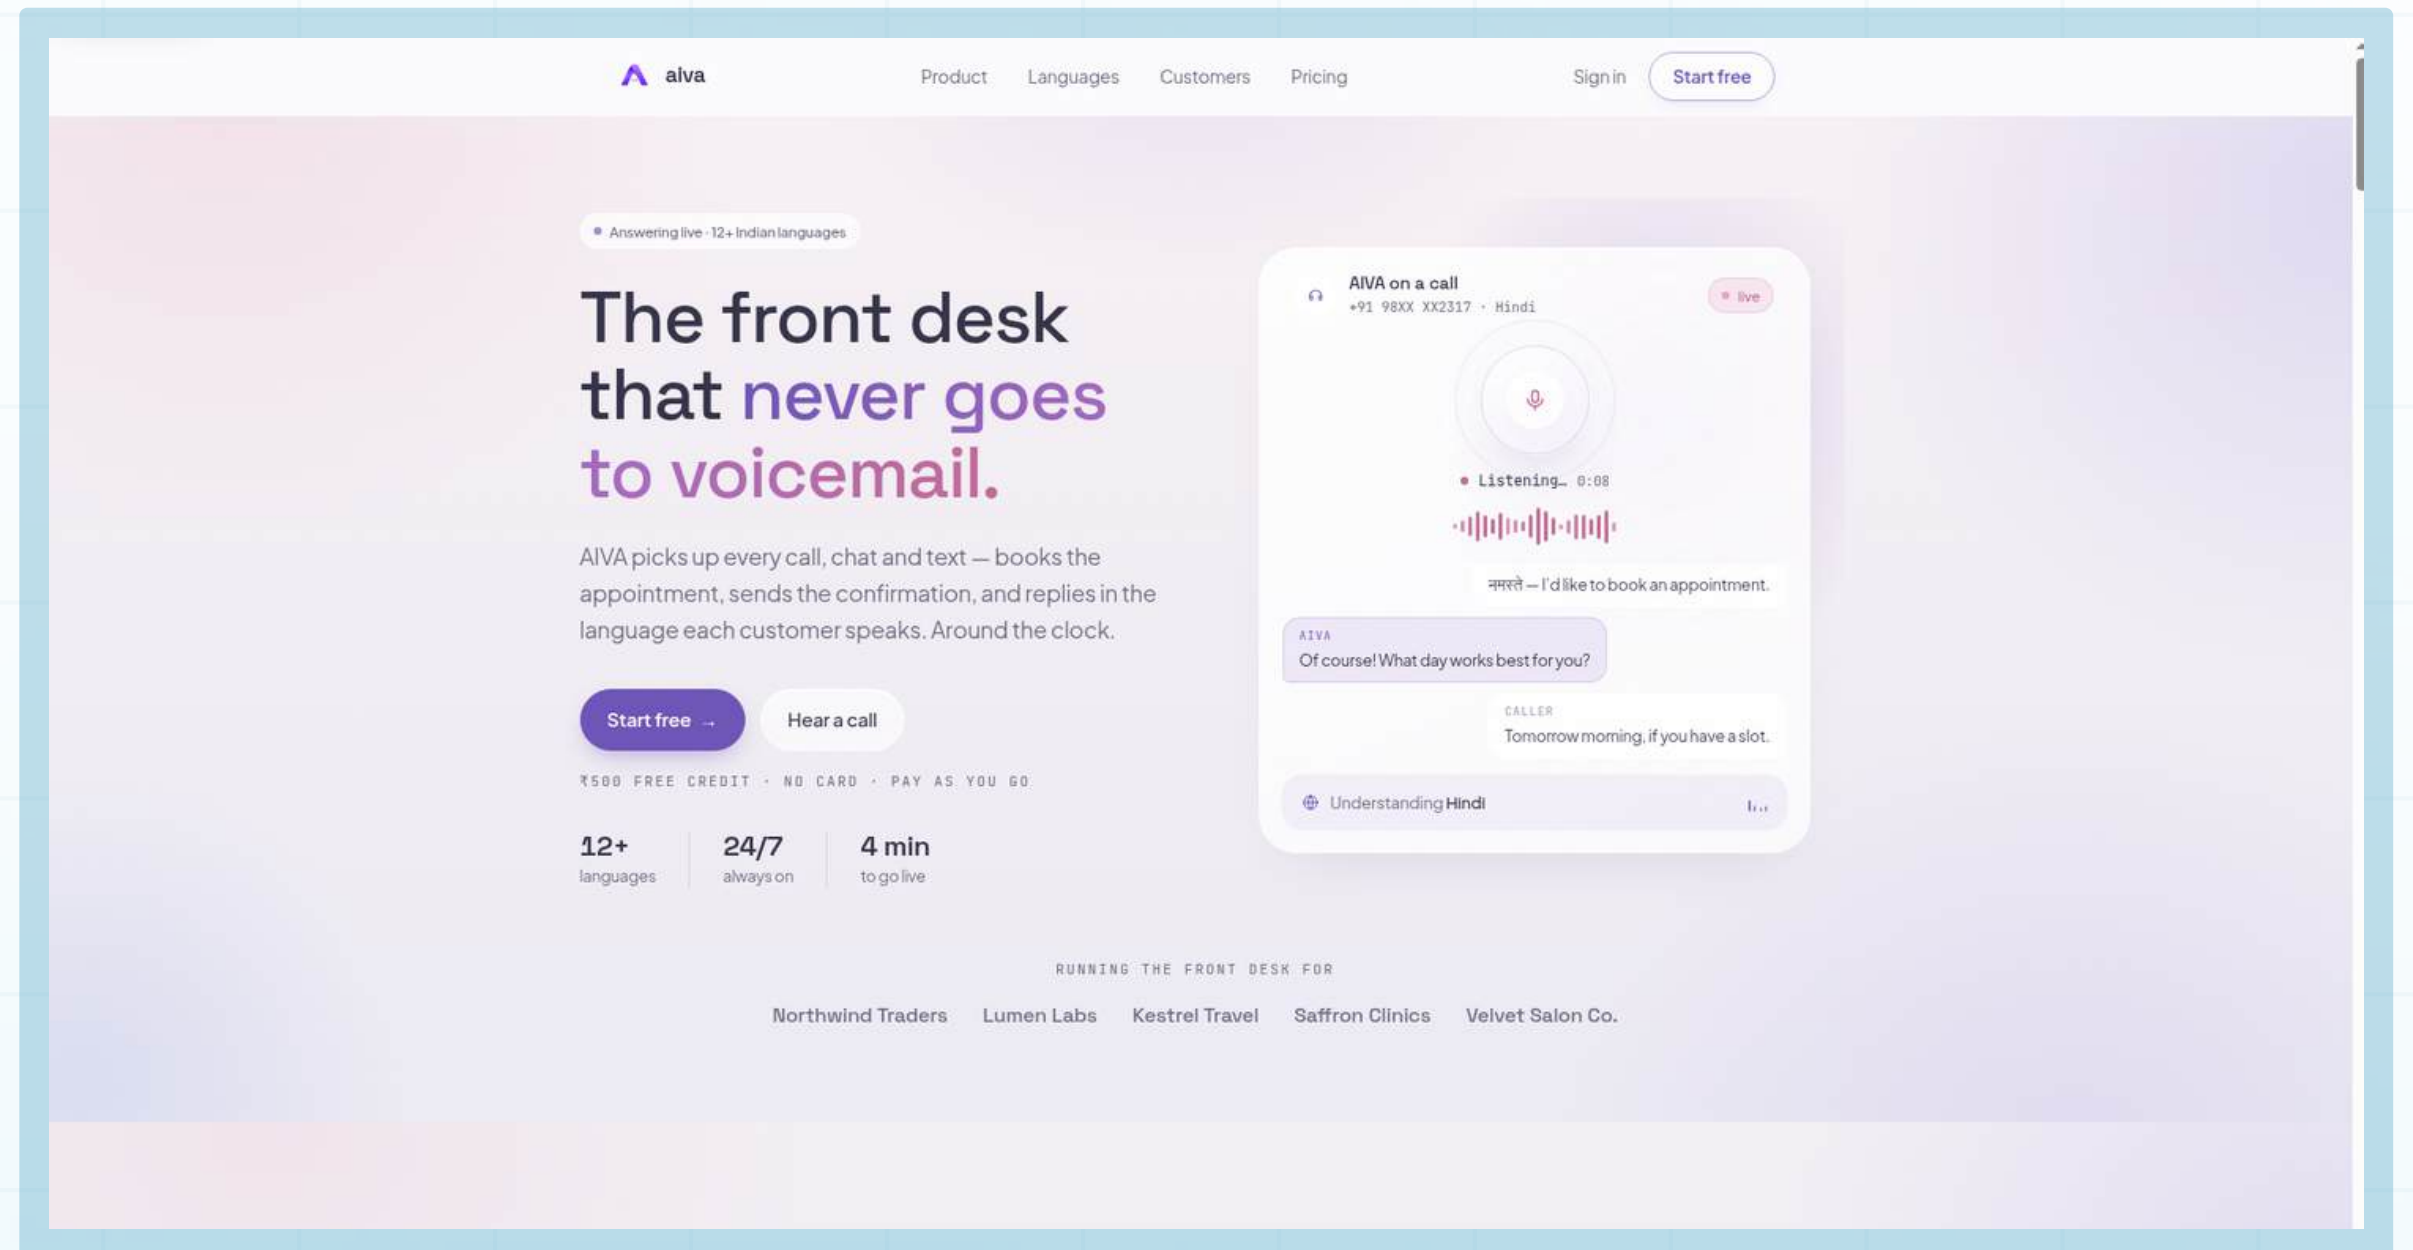

- Built a platform to instantly create and deploy AI voice chatbots and embeddable chat widgets across web, phone, and apps.
- Full call recordings, detailed logs, and analytics for every conversation.

Technology Stack:

- AI Agent Development
- Conversational AI
- AI Agent Development
- ElevenLabs
- Twilio
- OpenAI API

Link:

- <https://aivachat.io/>

Stockly – AI-Powered Stock Market Platform

Features:

- Connects users with investors, experts, and AI-powered assistants for stock market insights.
- Helps users stay informed with real-time financial data and analysis.
- Provides a social platform for discussing stock trends and investments.

Technology Stack:

- Frontend: React.js (Web), React Native (App)
- Backend: Node.js, Python
- Database: PostgreSQL
- 3rd Party Integration: Polygon API

Quick Hub – Online Reputation Management Platform

Features:

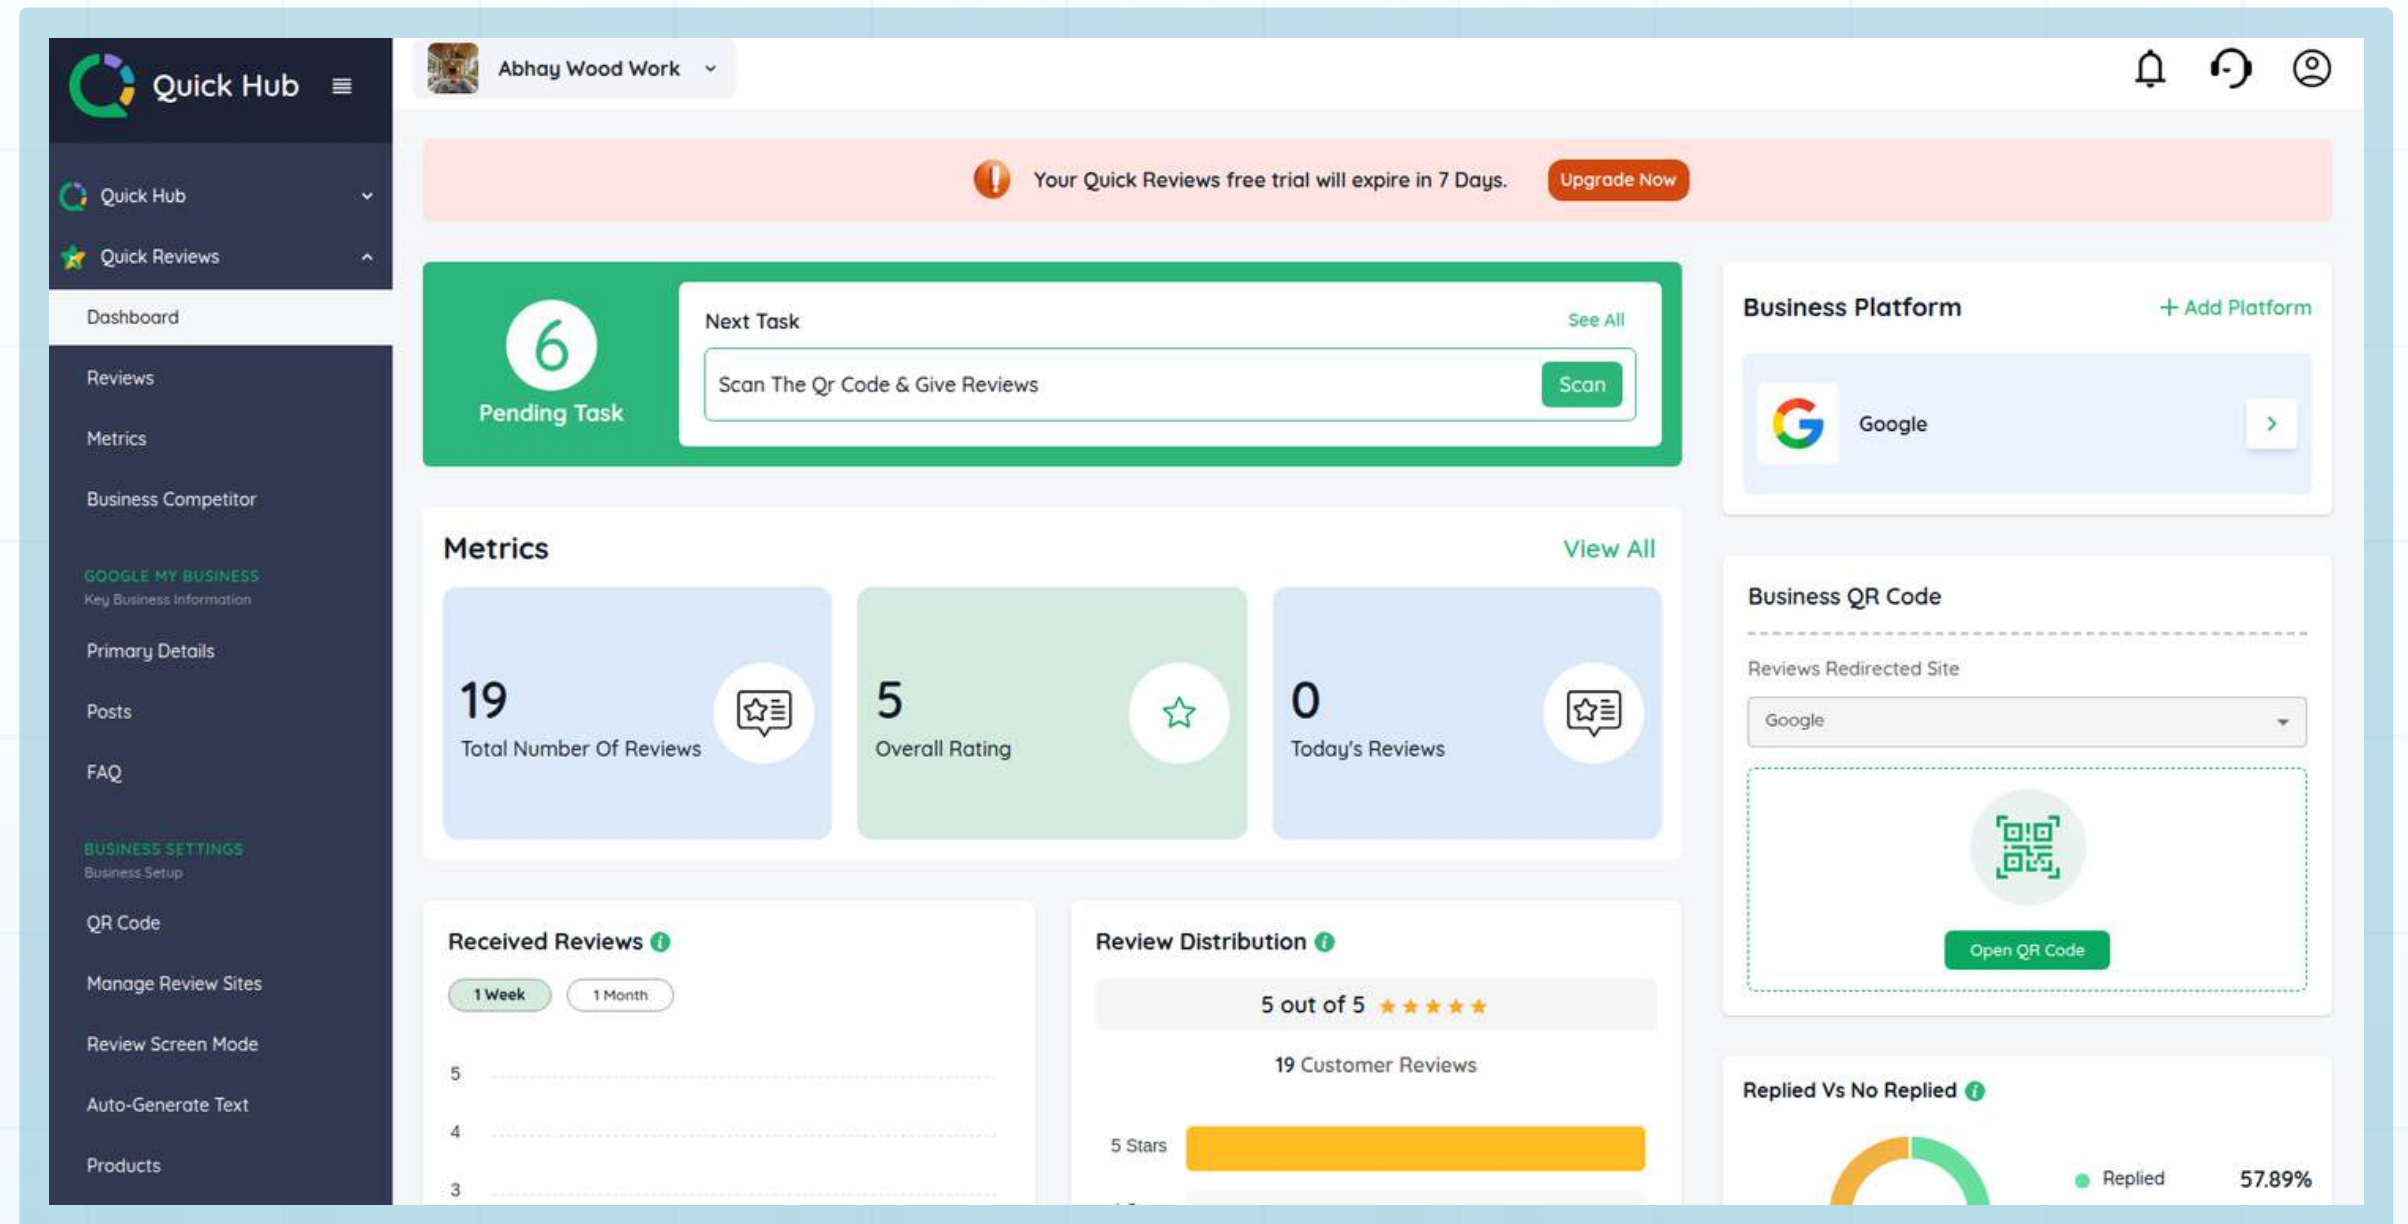

- It helps businesses manage online reviews and improve their reputation.
- Uses AI to analyze customer feedback and provide useful insights.
- Allows businesses to monitor and respond to reviews in one place.

Technology Stack:

- Frontend: React.js
- Backend: Nest.js, GraphQL
- AI Stack: OpenAI
- Other Integrations: Map API, Prisma

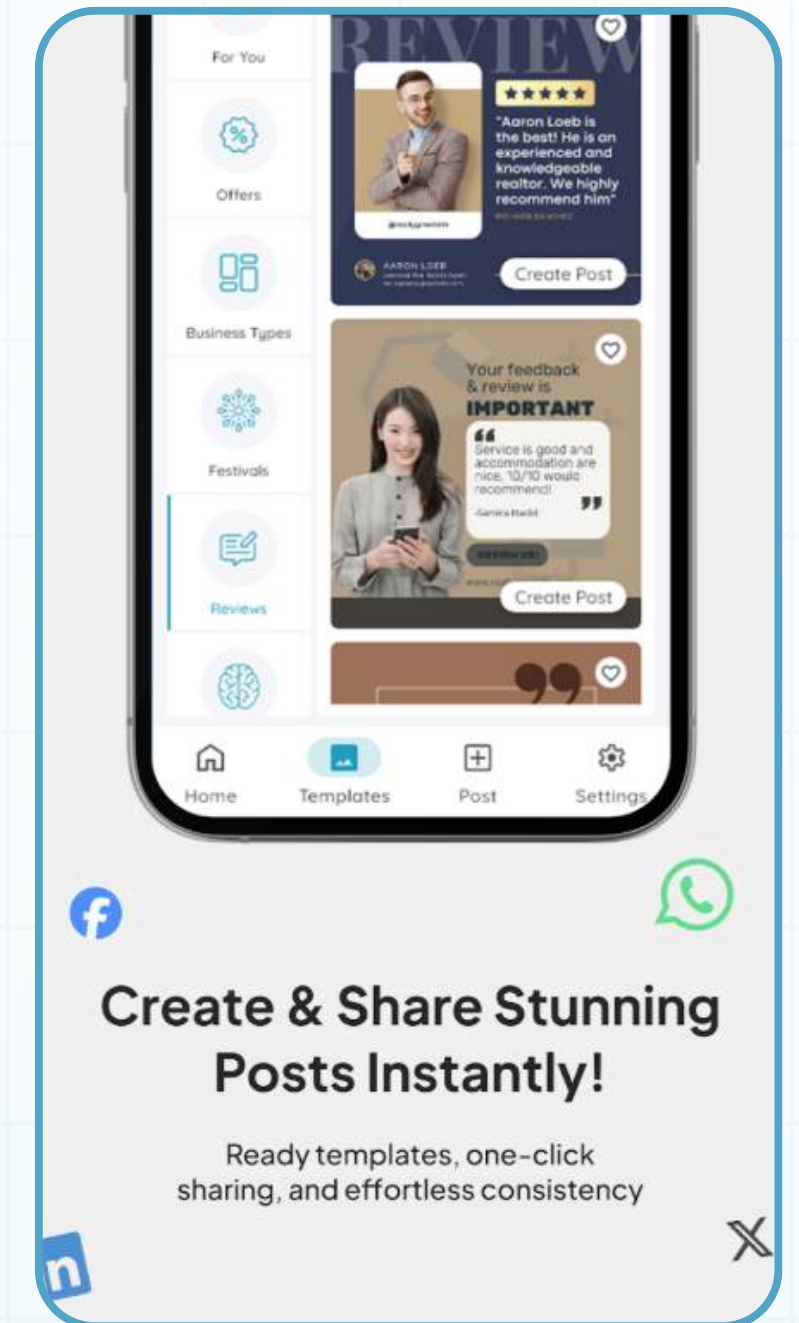

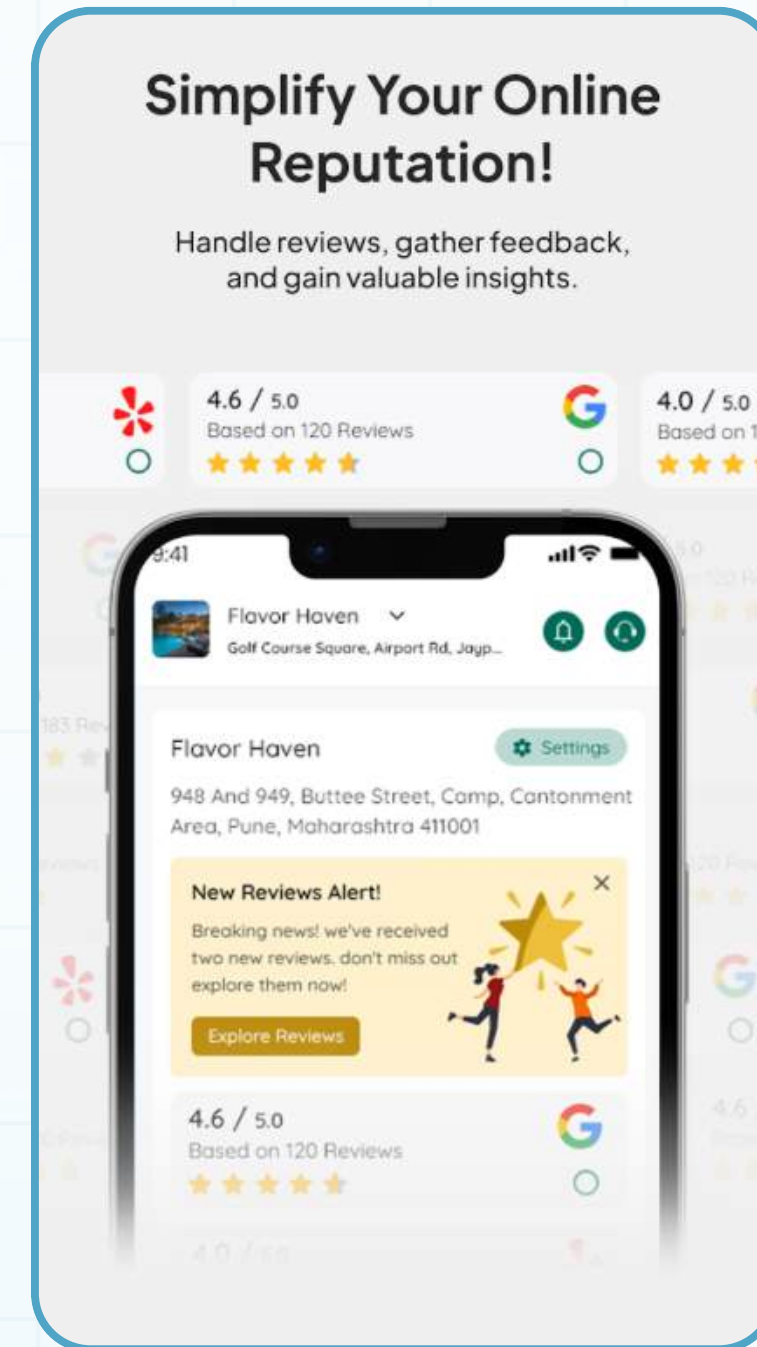

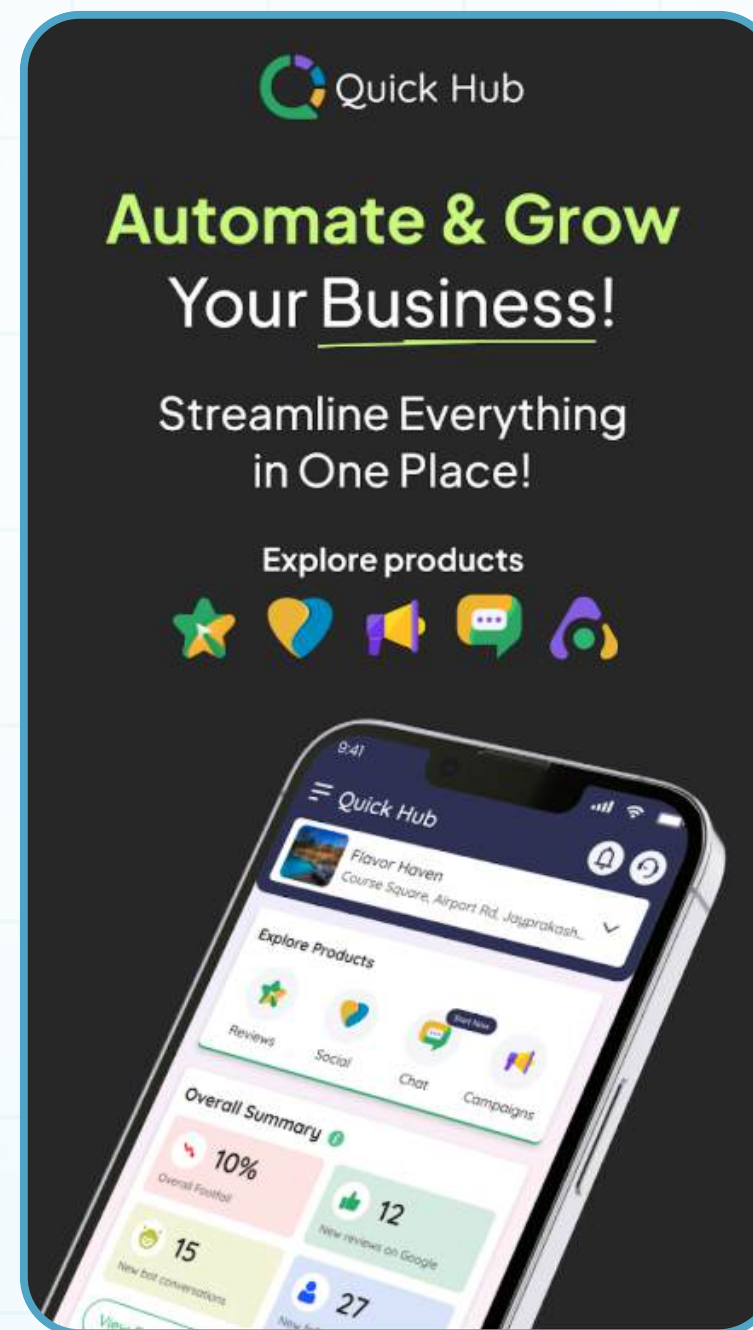

Link:

- <https://www.quickhub.ai/>

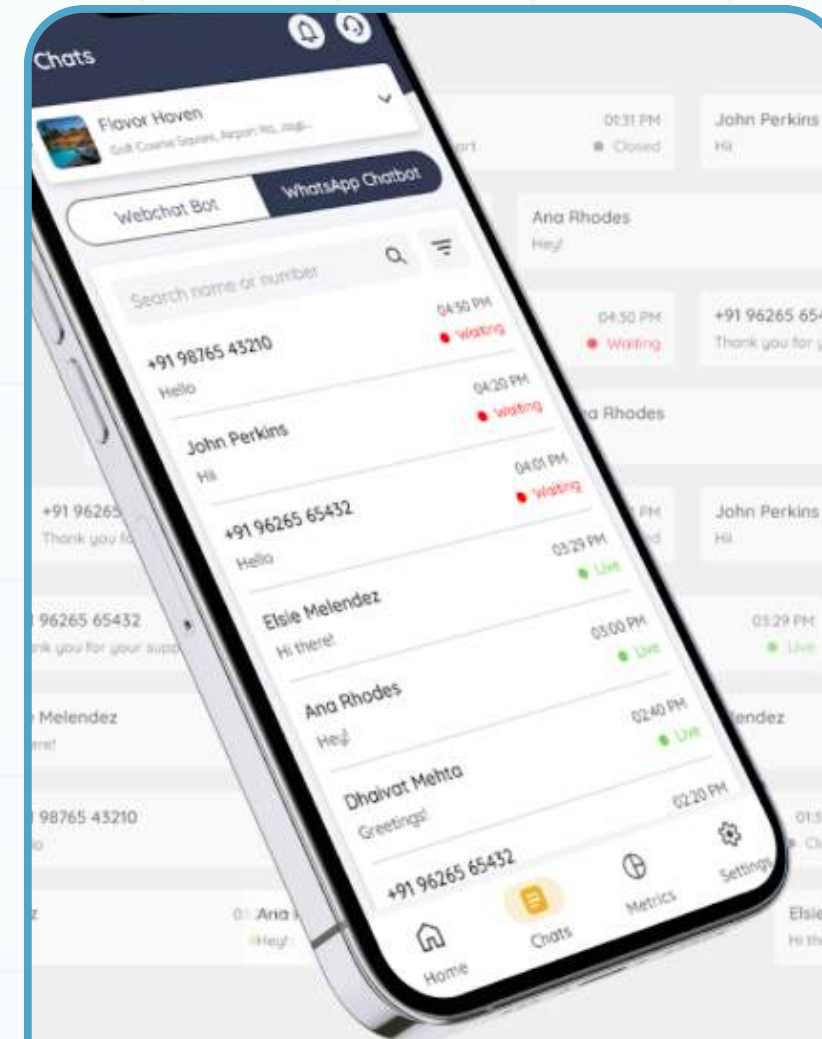

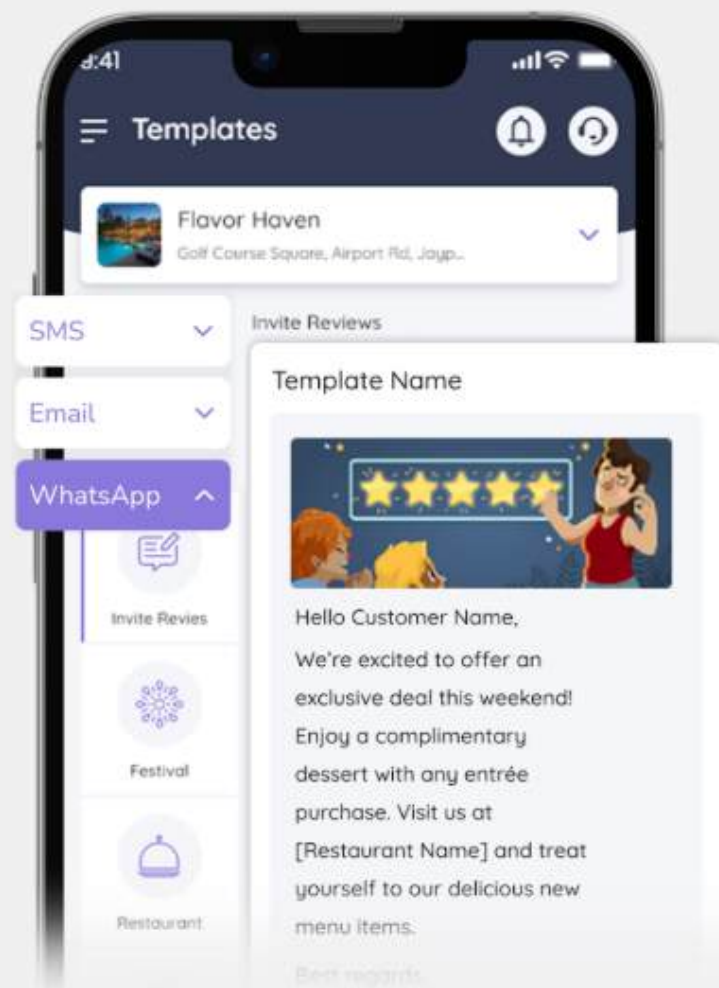

Features:

- **Review Management:** Collect and respond to customer reviews to manage your online reputation.
- **Campaign Automation:** Run targeted marketing campaigns to reach potential customers effectively.
- **Social Media Integration:** Create and schedule engaging social media posts to enhance brand presence.
- **WhatsApp Automation:** Automate customer chats and replies for efficient communication.
- **Unified Calendar:** Manage posts, campaigns, ads, and broadcasts in one centralized platform.
- **Brand Customization:** Add your brand logo to templates for personalized marketing materials.

Reach Customers Where They Are!

Send WhatsApp, SMS & email campaigns and track results in one place!

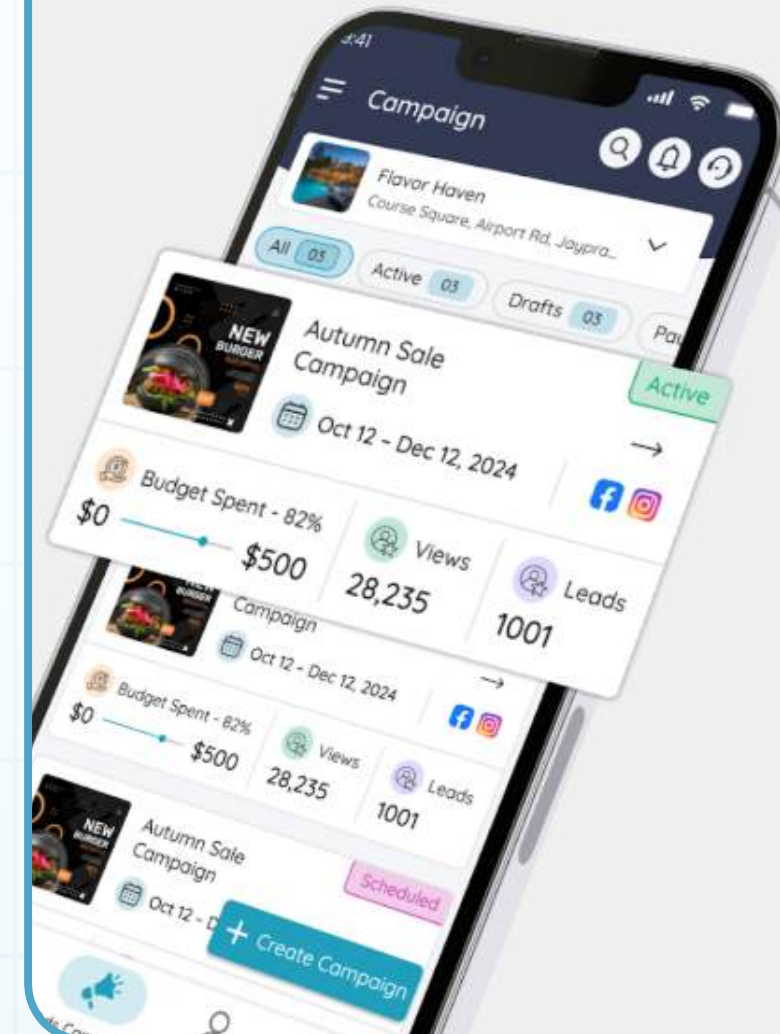

Engage Customers Anytime, Anywhere!

Chat in real-time, convert leads easily, and let smart bots handle the rest!

Run Ads in Minutes, Hassle-Free!

Effortlessly launch ads, preview before publishing, and reach the right audience!

Grow Your Business with Quick Hub!

App + Web Tools for Seamless Management.

Hcomb – AI-Driven Hiring & Training Platform

Features:

- A hiring and training platform that uses AI to match candidates with jobs.
- Automates the job posting process and conducts AI-powered interviews.
- Helps companies find the best talent quickly and efficiently.

Link:

- <https://www.hcomb.ai/>

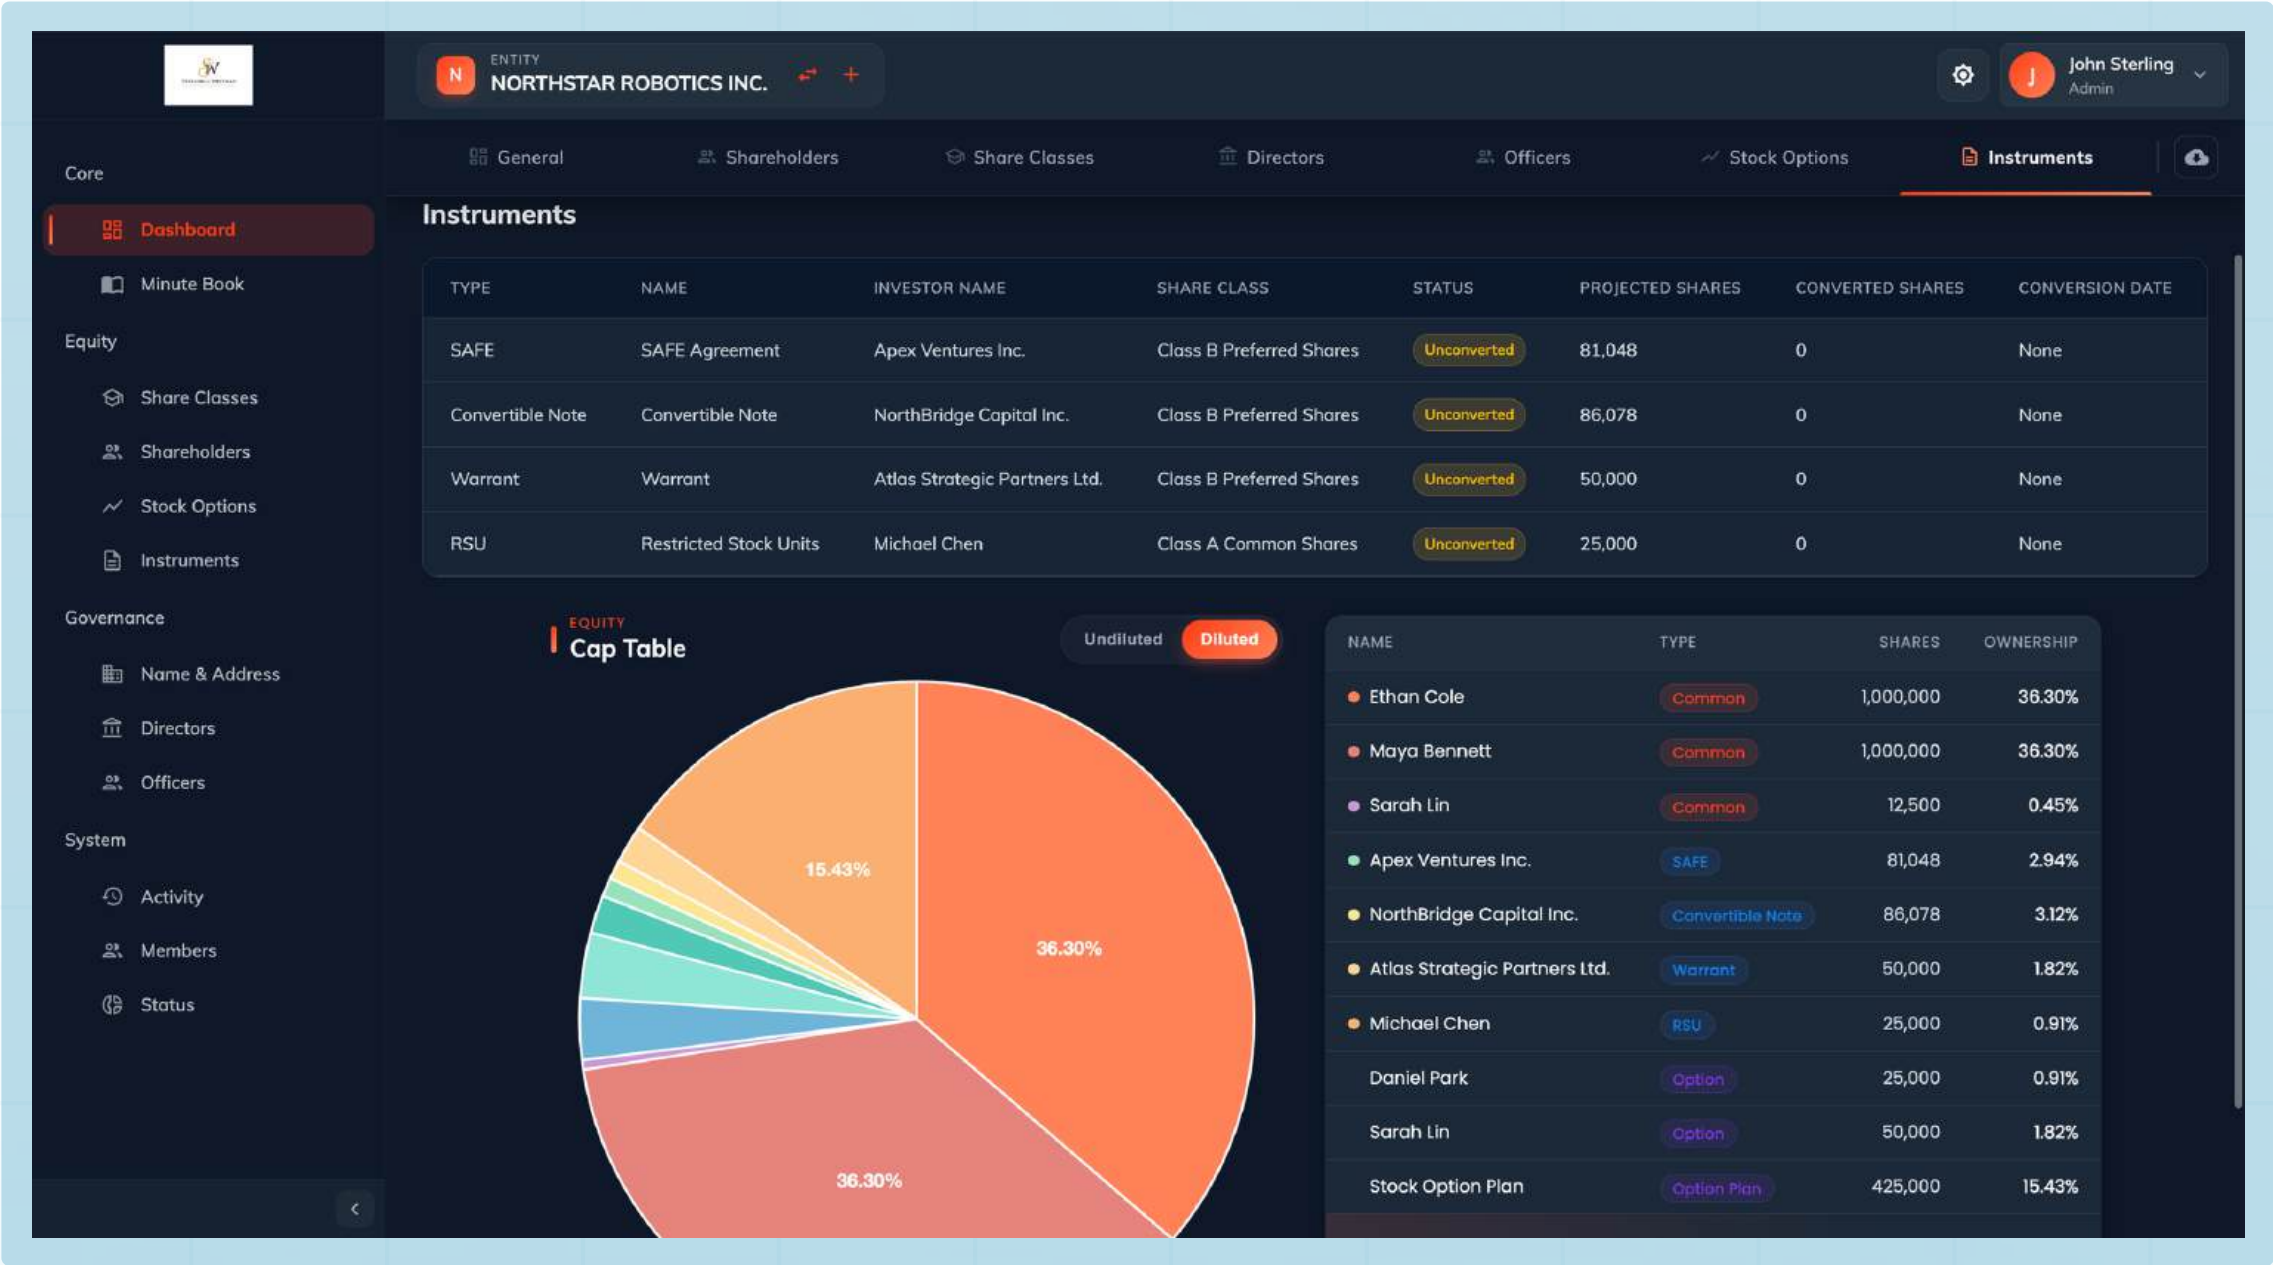

Incorporight – Secure Corporate Information Management

Features:

- A secure platform for managing company records, including shareholders, directors, and executives.
- Stores and protects sensitive company data with blockchain technology.
- Provides a structured way to track corporate governance and compliance.

Link:

- <https://corprite.co/>

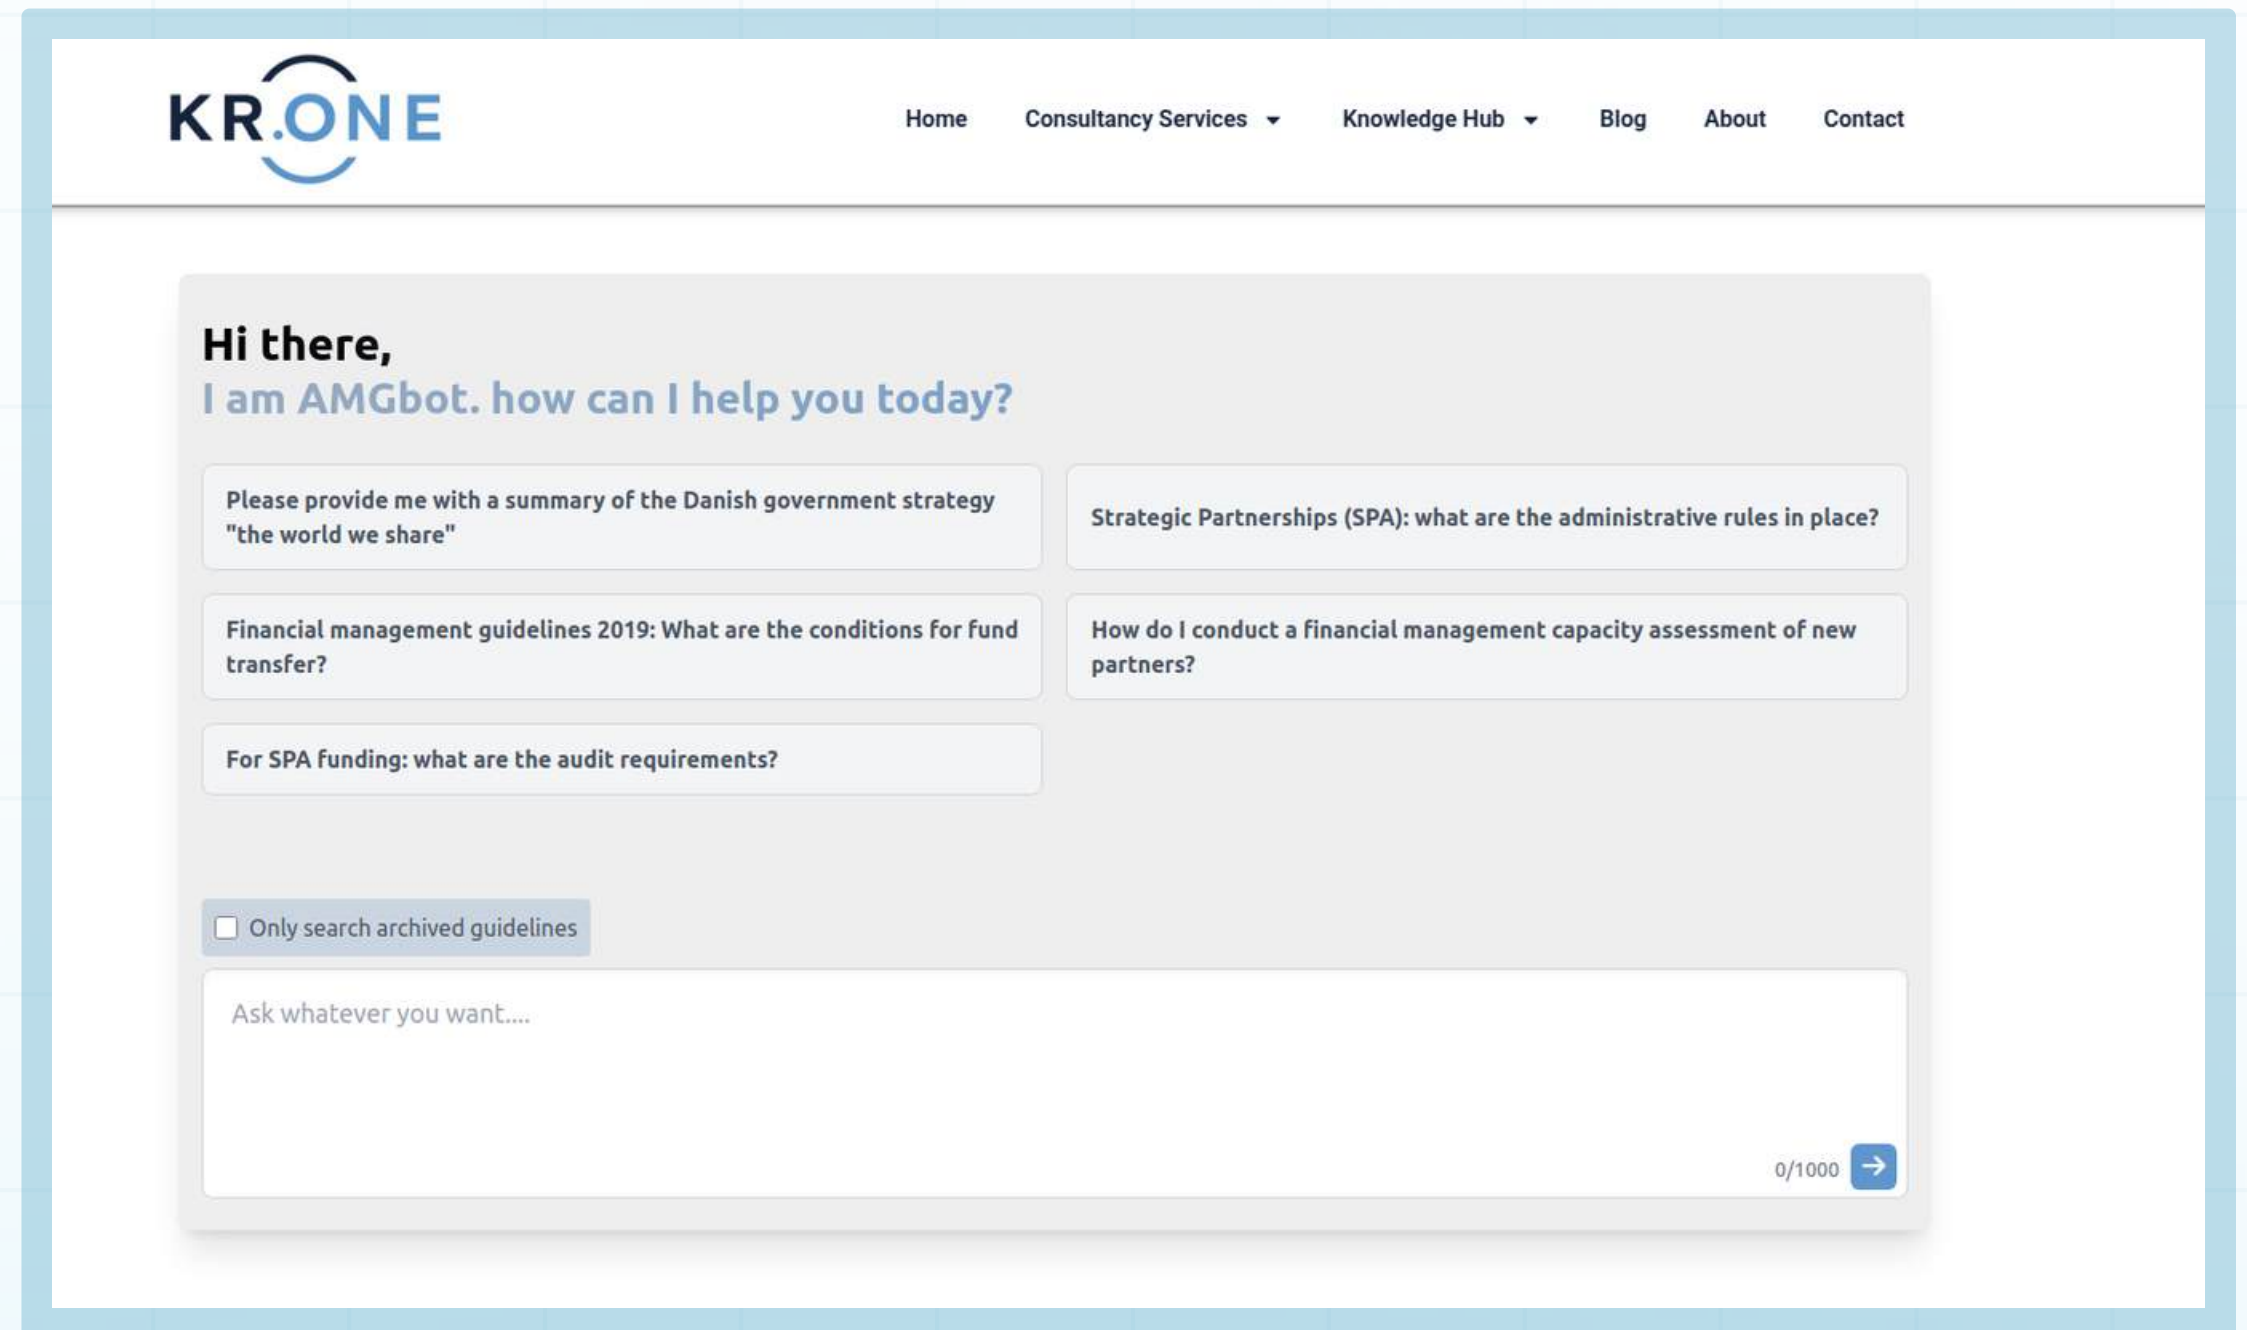

Krone – AI-Powered Compliance & Consulting Platform

Features:

- A consultancy platform led by Christian Krone, specializing in compliance, anti-corruption, financial management, and ESG (Environmental, Social, and Governance).
- Provides expert insights and advisory services for businesses navigating complex regulations.

Link:

- <https://www.krone.one/>

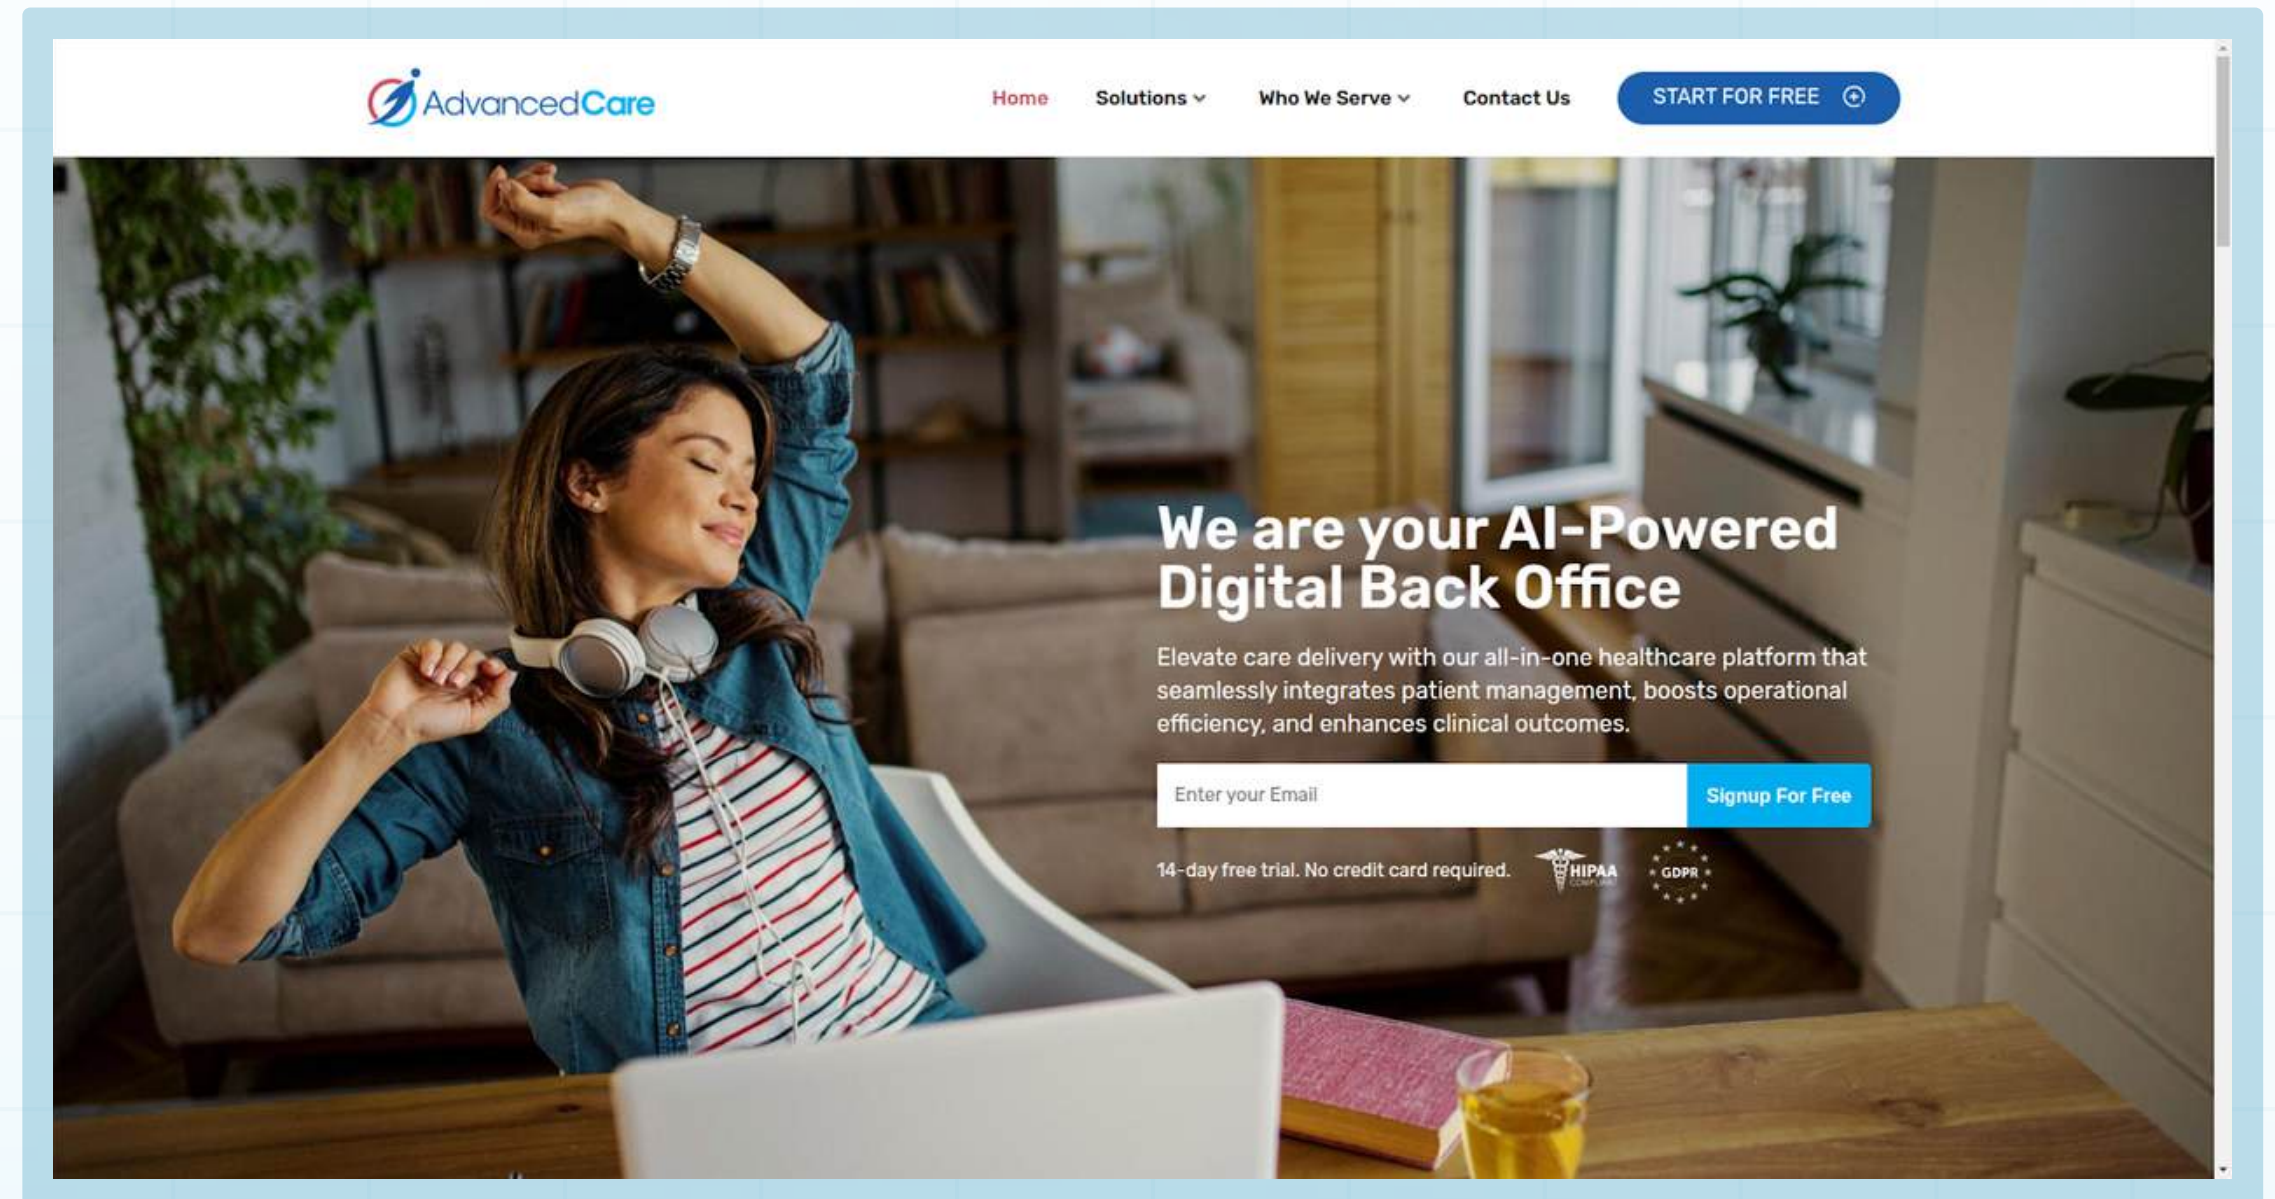

AdvancedCare – AI-Powered Electronic Health Records

Features:

- A complete electronic health record (EHR) system that helps doctors and hospitals manage patient data.
- Includes telehealth services for remote patient consultations.
- Supports insurance claims processing to simplify billing.

Link:

- <https://advancedcare.com/>

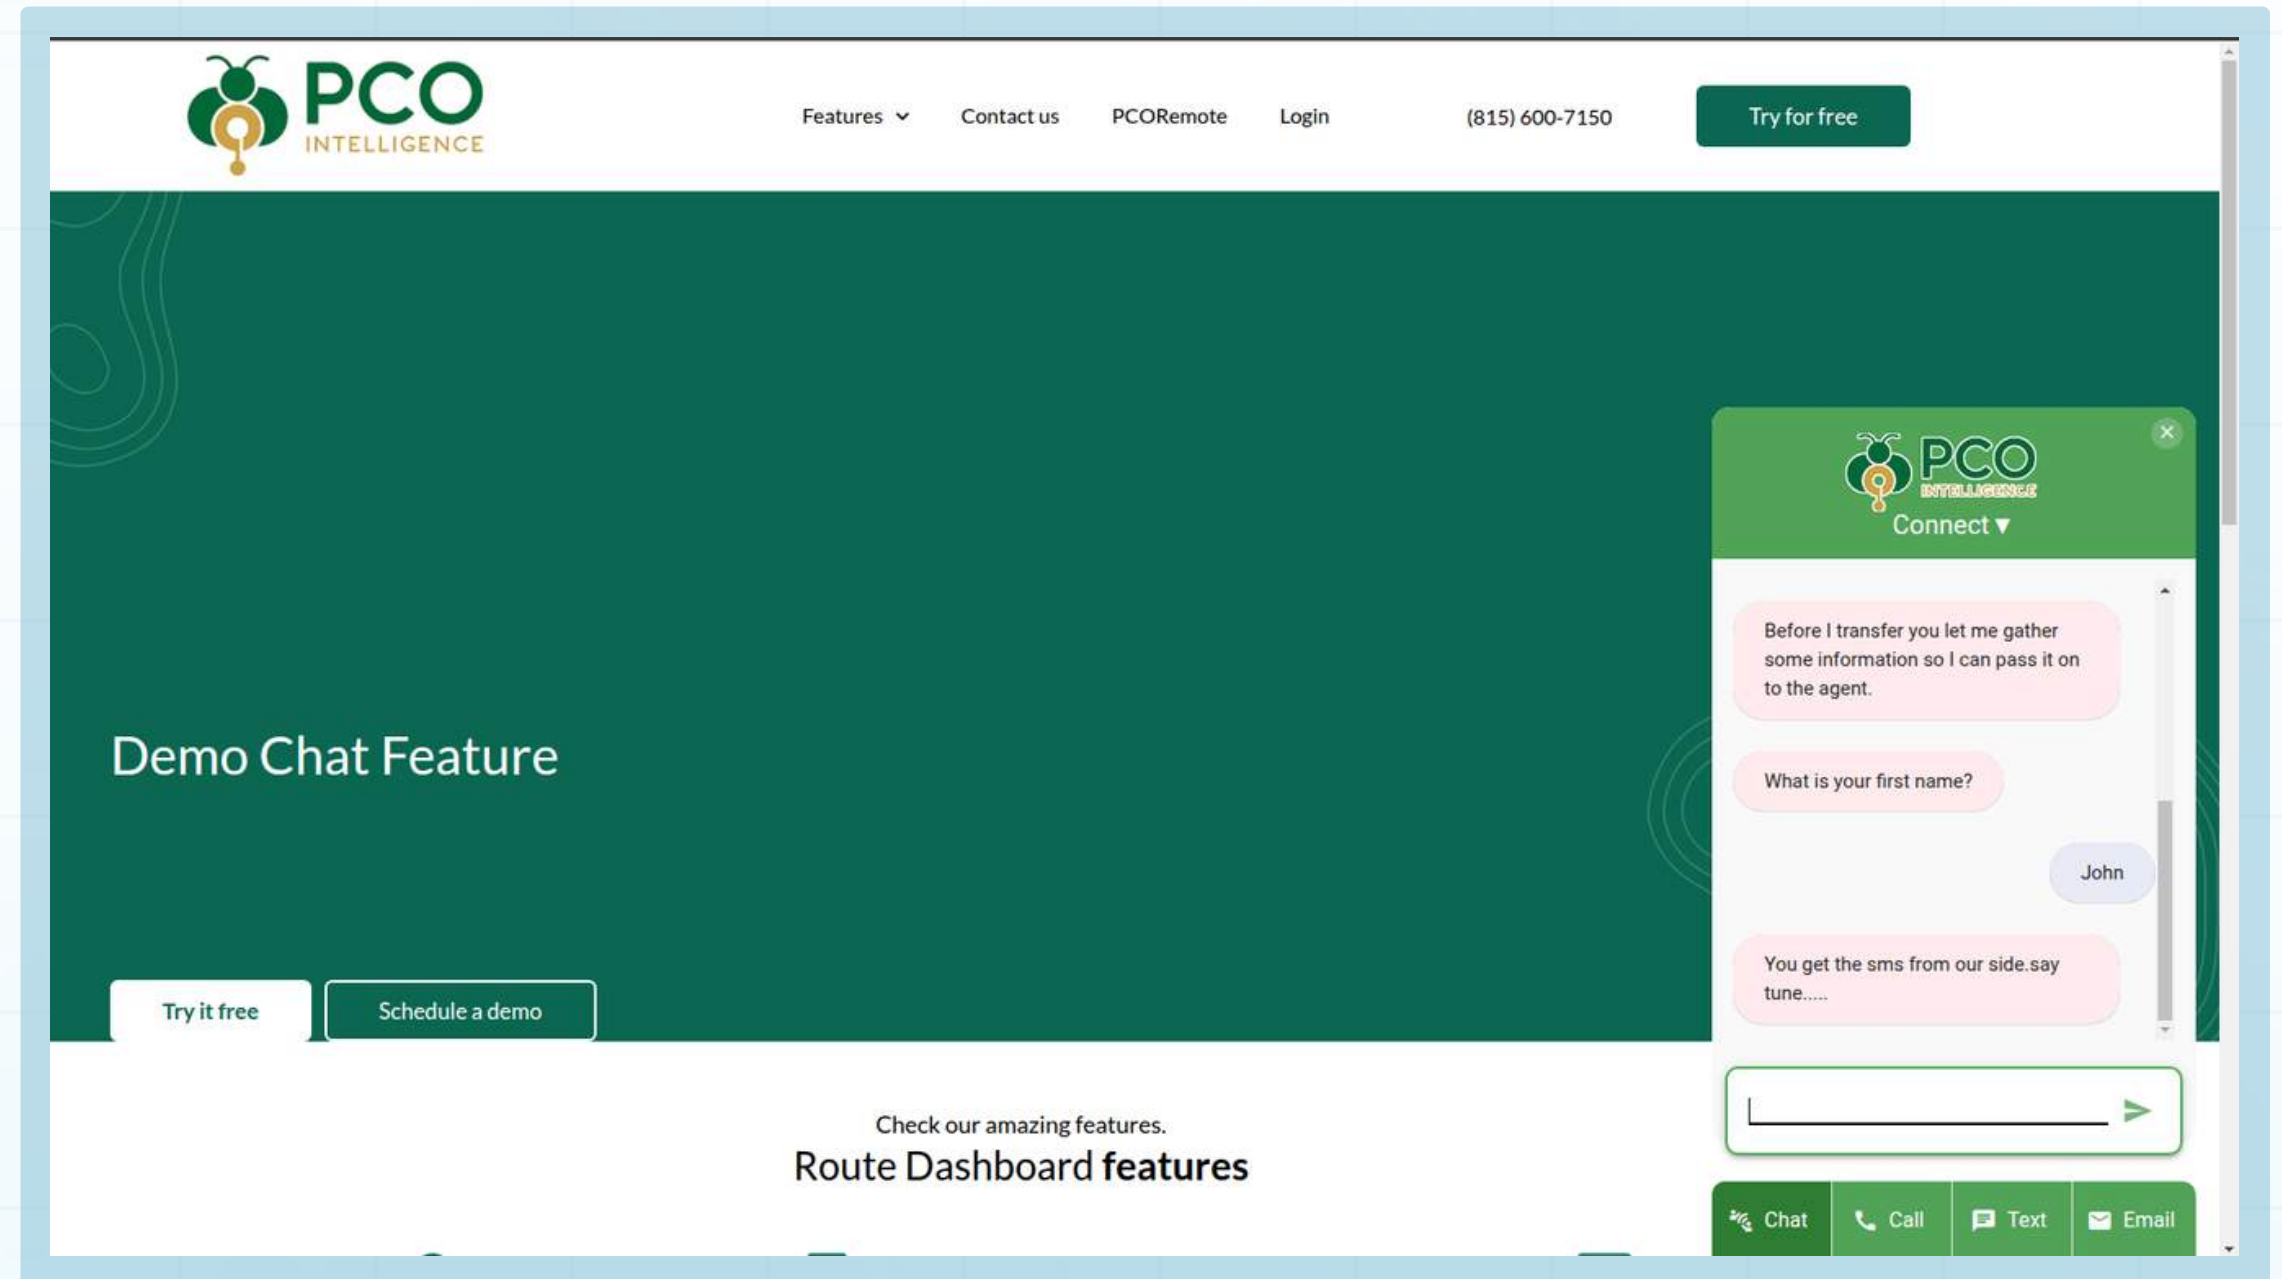

PCO Intelligence

Features:

- Uses Amazon Lex to handle customer queries through AI-powered conversations.
- Integrates Amazon Connect to provide a cloud-based call center solution.
- Allows businesses to automate customer support with voice and chatbot interactions.
- Custom widget support enables businesses to enhance the user experience with personalized features.

Link:

- <https://pcointelligence.com/>

YellowPad AI

Features:

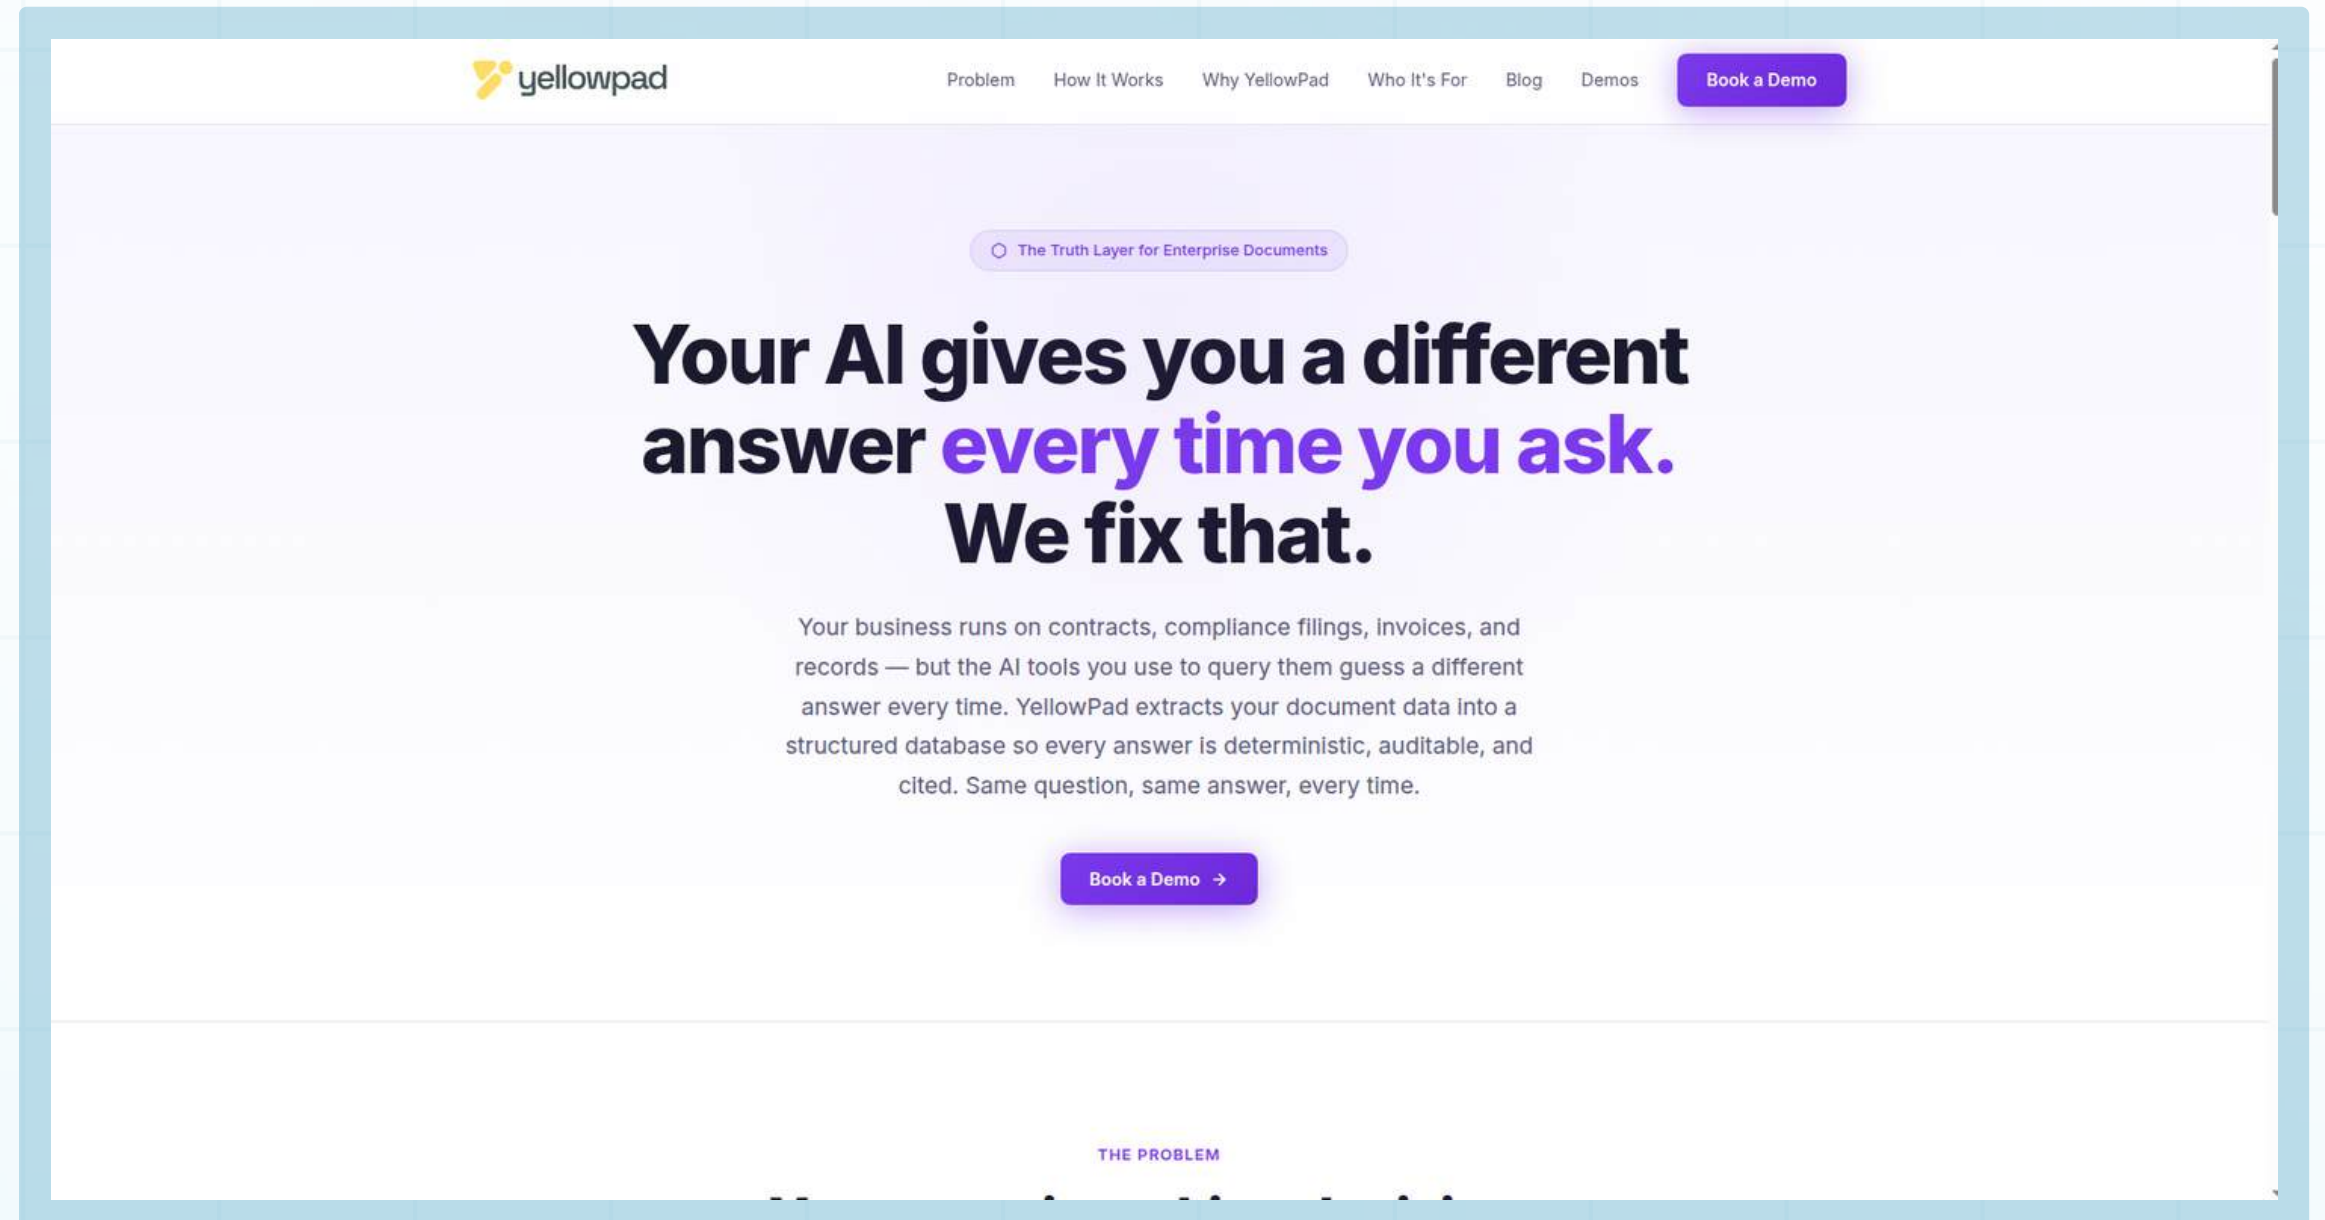

- .Built an AI-powered legal document platform that automates drafting with intelligent templates and smart suggestions
- Helping legal professionals produce contracts, briefs, and standard agreements in a fraction of the usual time.

Technology Stack:

- Frontend: React.js
- Backend: Python
- AI Stack: OpenAI API, LLM Prompt Engineering, Large Language Model

Link:

- <https://www.yellowpad.ai/>

Sydon AI

Features:

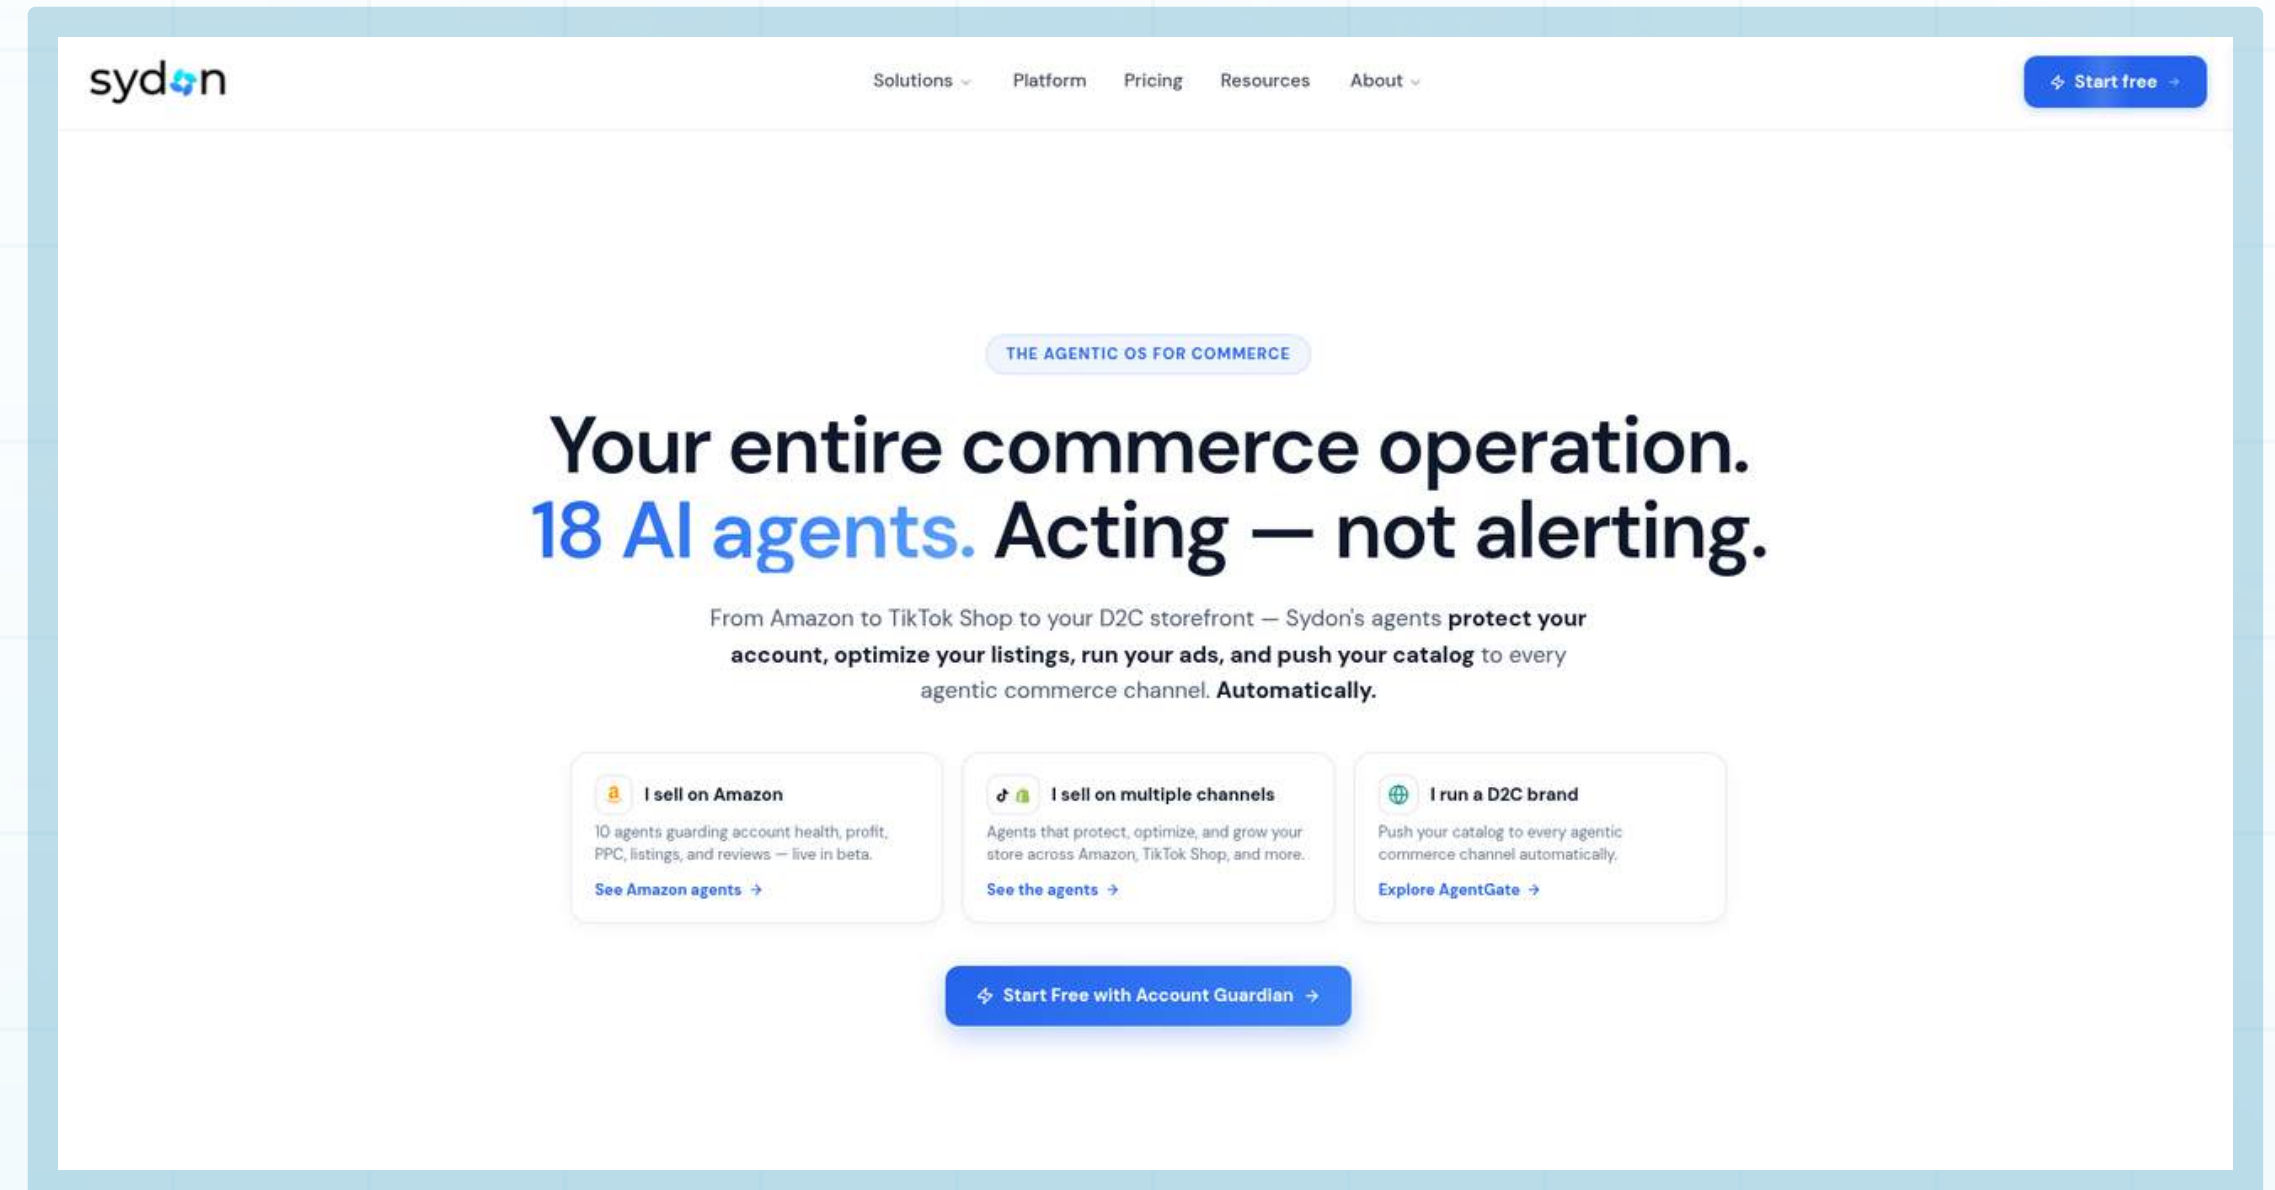

- Built an AI-powered platform for Amazon sellers that gives a complete view of account health.
- Profit, margins, FBA insights, competitor analysis, and product-level performance – plus AI-driven outreach + reply automation for sales conversations.

Technology Stack:

- Amazon FBA
- OpenAI API
- Data Analytics
- Marketing Automation

Link:

- <https://sydon.ai/>

Goodfin AI – AI Financial Advisor for Personal Finance

Features:

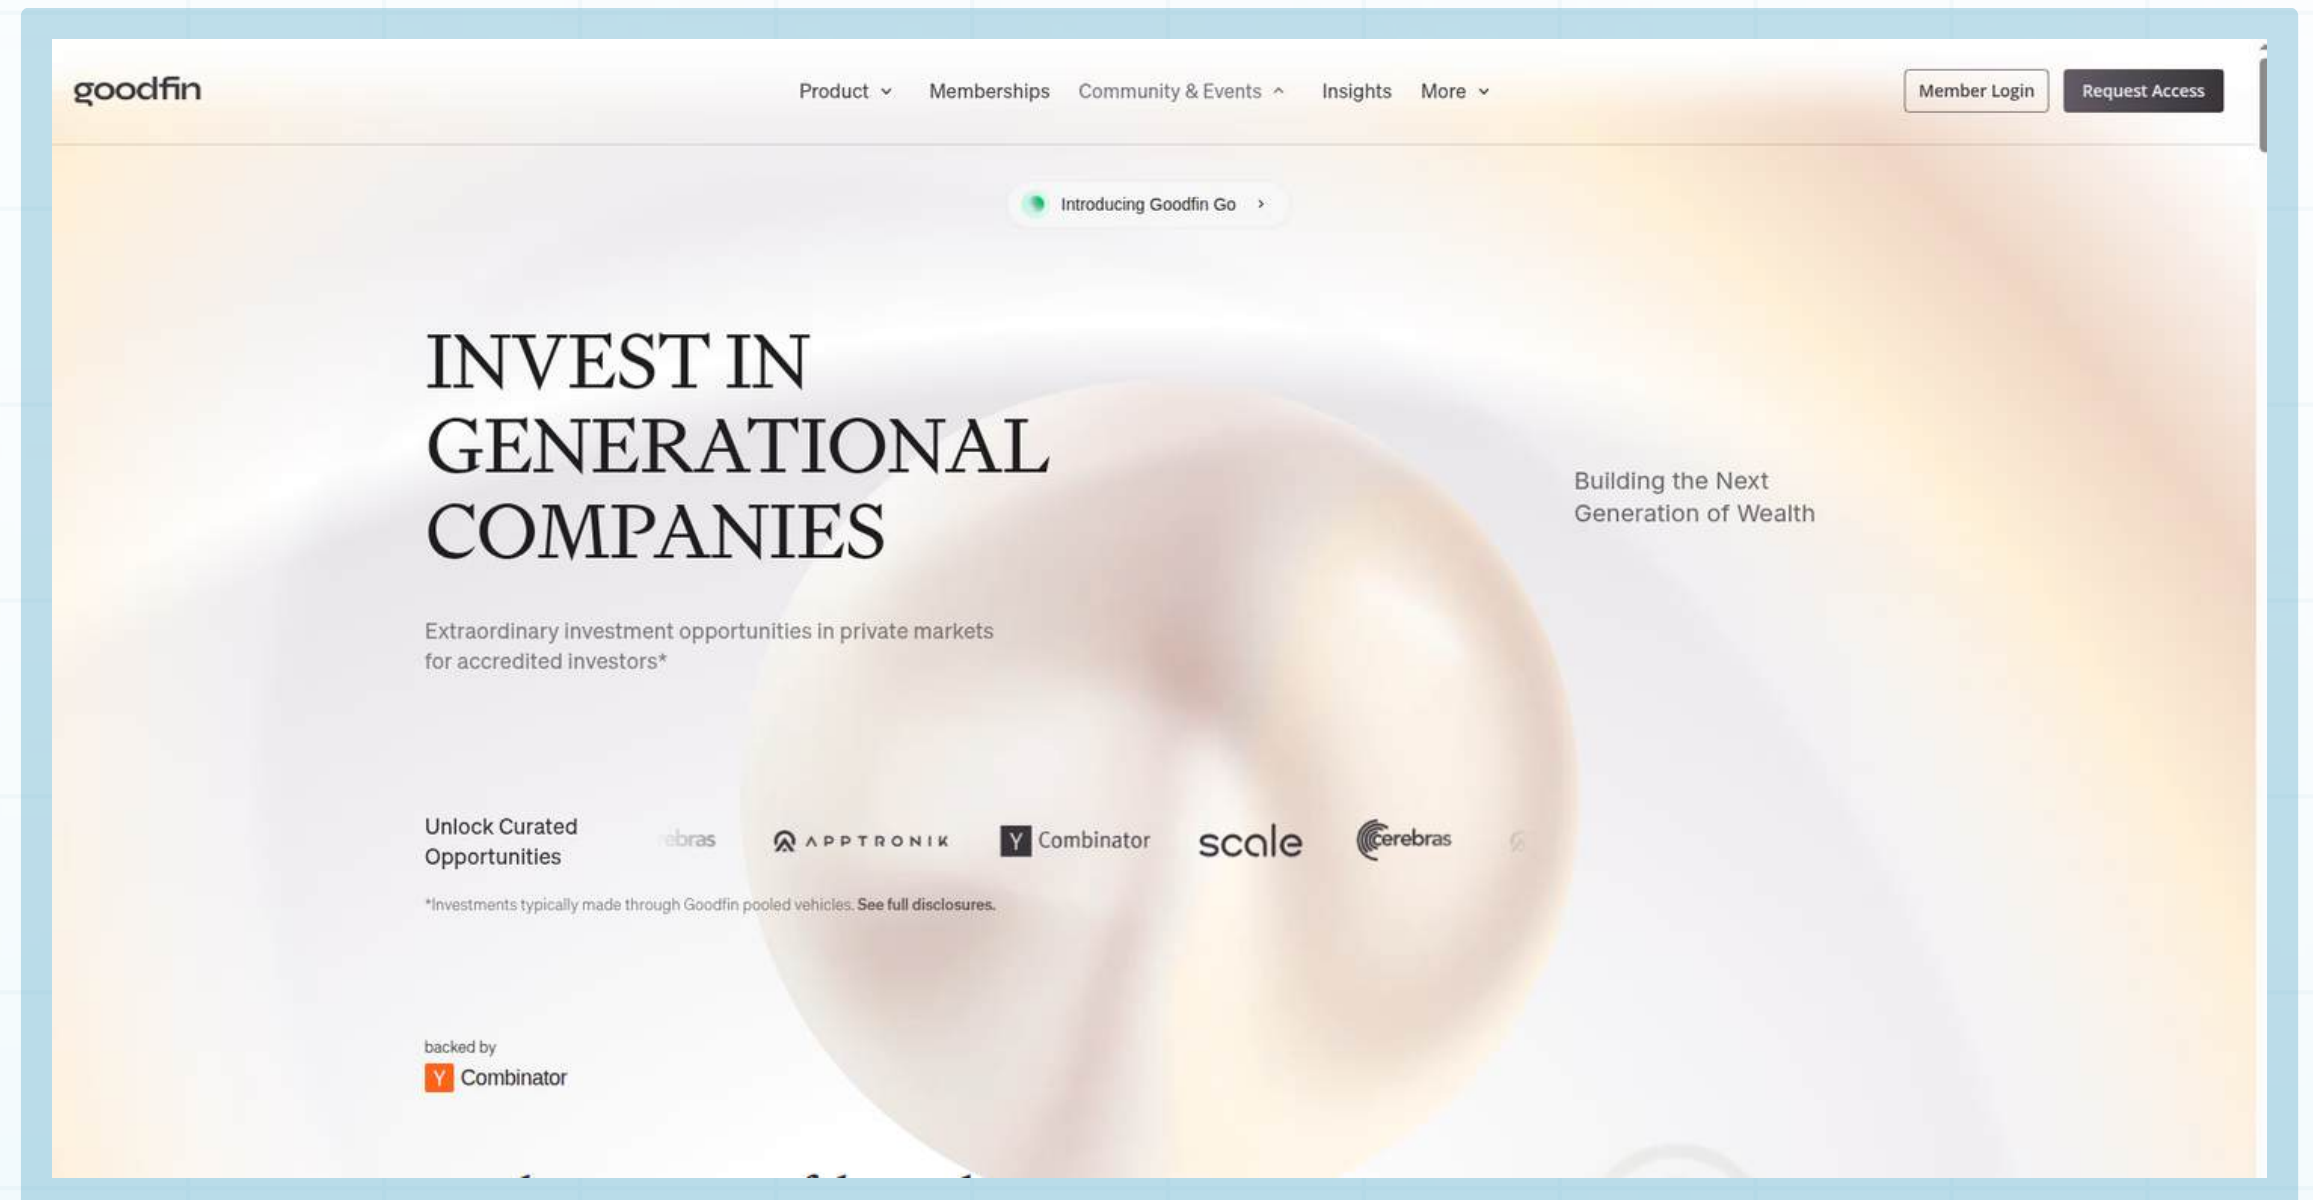

- Built an AI-powered financial advisor that connects to users' bank/brokerage accounts.
- Provides personalised budgeting, savings, and investment guidance through a conversational interface — plus alerts on spending patterns and goals.

Technology Stack:

- OpenAI GPT-4
- LLM tool-calling
- AI Agent Development
- Large Language Model
- React + Node, analytics dashboards.

Link:

- <https://www.goodfin.com/>

ChatGPT api integration

Features:

- Free AI Obituary Writer
- Just enter a few basic details, and it will automatically write the letter for you.

Technology Stack:

- OpenAI GPT-4
- Node Js
- Amazon Web Services

Link:

- <https://www.lalo.app/>

The screenshot shows the 'Lalo' app interface with a 'Biography' form. The form is set against a dark background with a stylized orange and white graphic of a person's head and shoulders. The form fields are as follows:

Biography	
jony patel	What did they like to be called?
dd/mm/yyyy	City, State, Country
01/11/2023	City, State, Country
City, State, Country	Enter a religion
Branch, Years Served	He/Him, She/Her, They/Them, etc.

A blue 'Next' button is located at the bottom right of the form.

Reknew AI

Features:

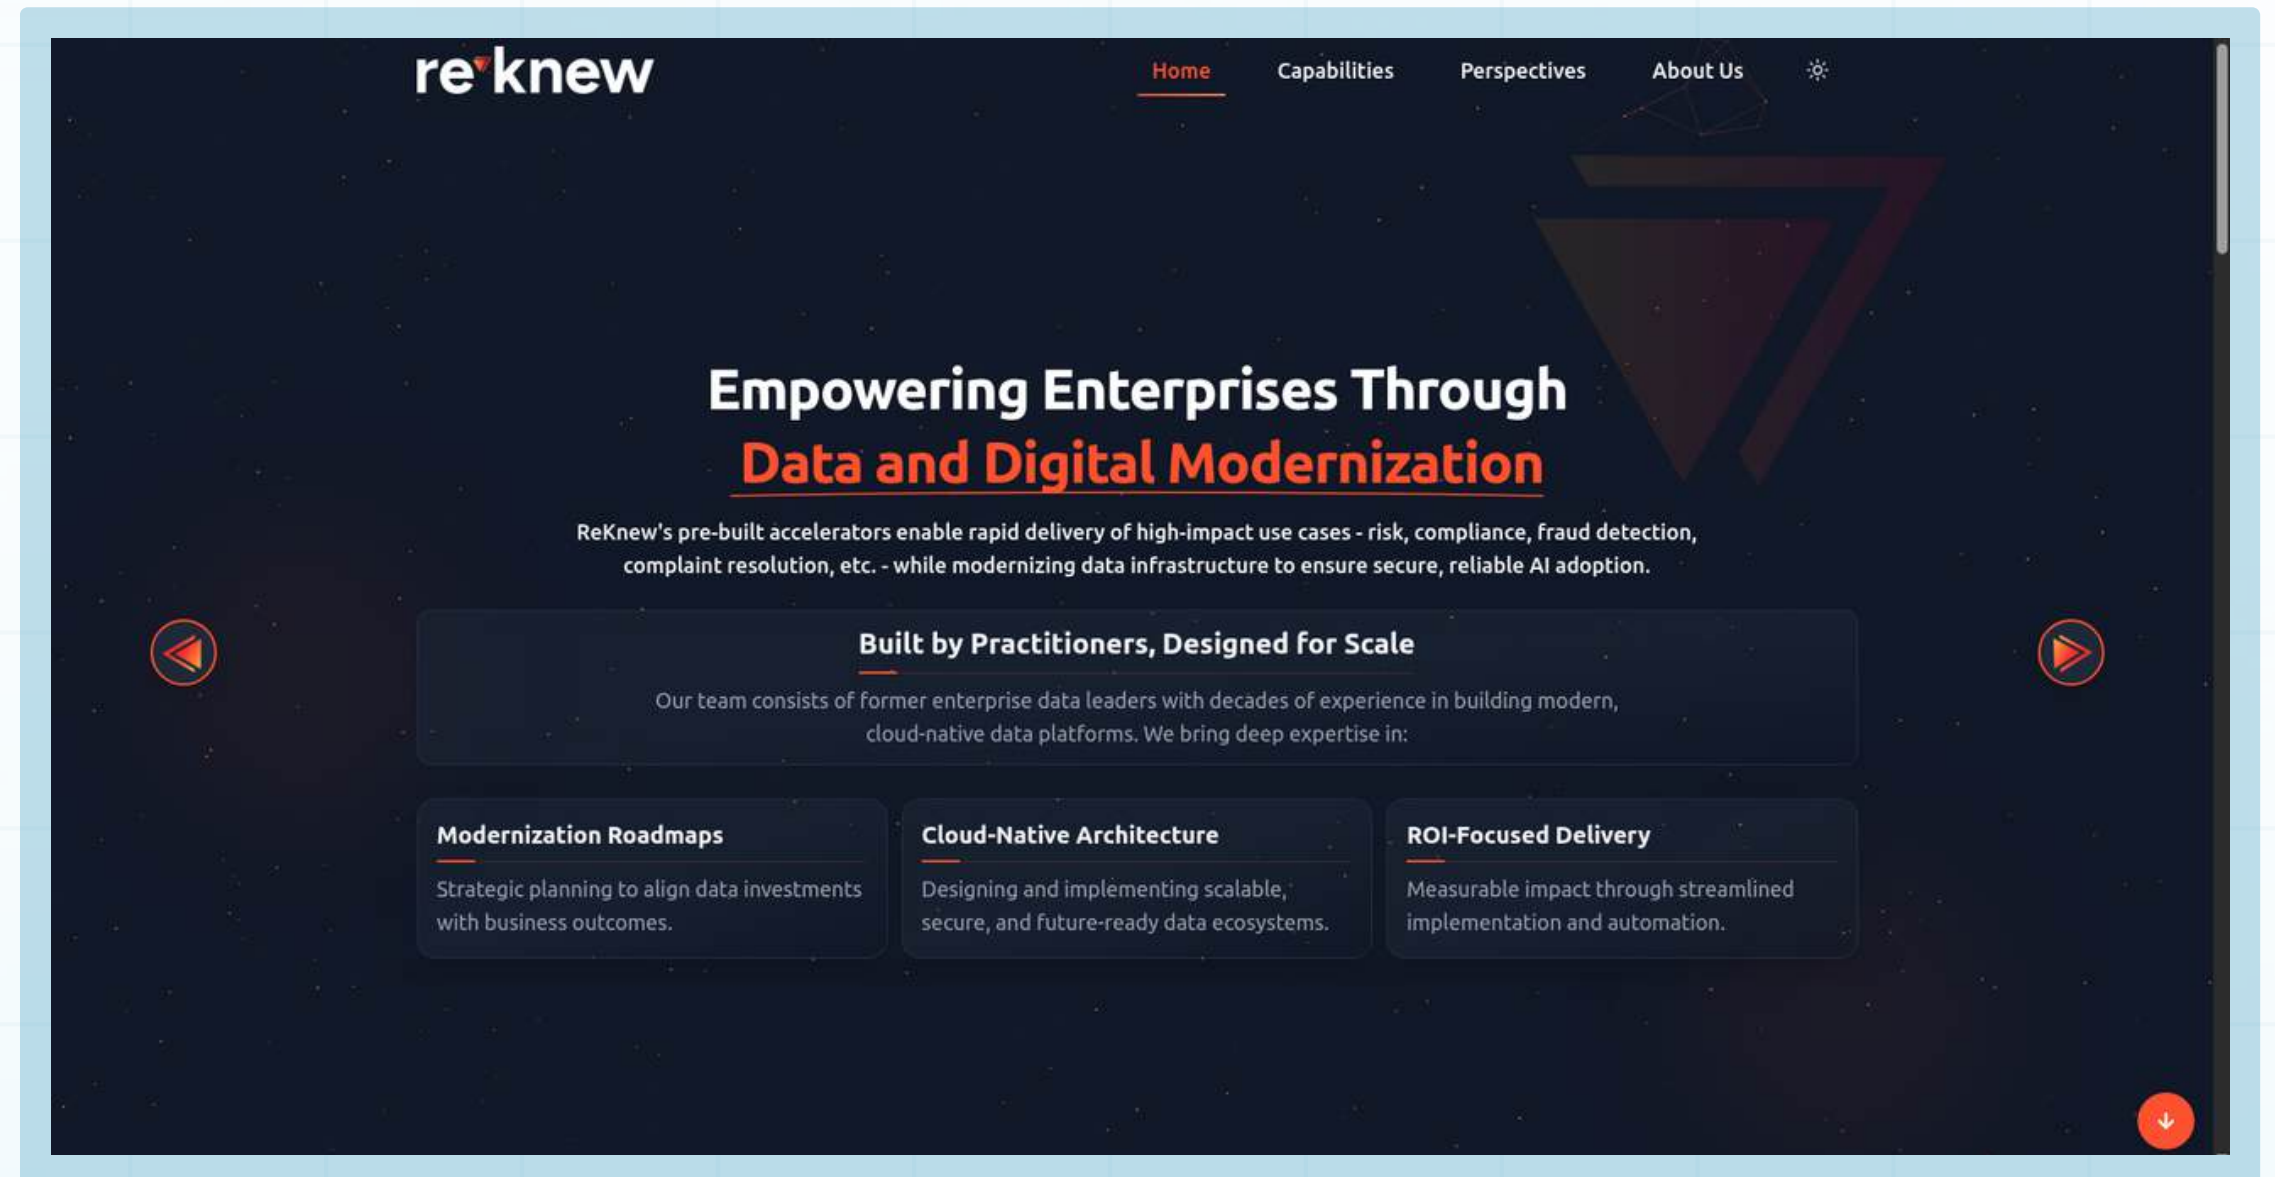

- Helps enterprises **modernize data platforms** for improved efficiency and scalability.
- Accelerates **AI adoption** to enable smarter insights and decision-making.
- Implements **intelligent automation** to streamline repetitive tasks and reduce manual effort.
- Focuses on digital transformation—upgrading legacy systems and driving enterprise-level modernization.

Technology Stack:

- Frontend: React.js
- Backend: Node.js, Python
- Database: PostgreSQL, MongoDB, Redis
- AI Stack: OpenAI, LLMs, NLP libraries

Link:

- <https://reknew.ai/>

OmniAI Chatbot

Features:

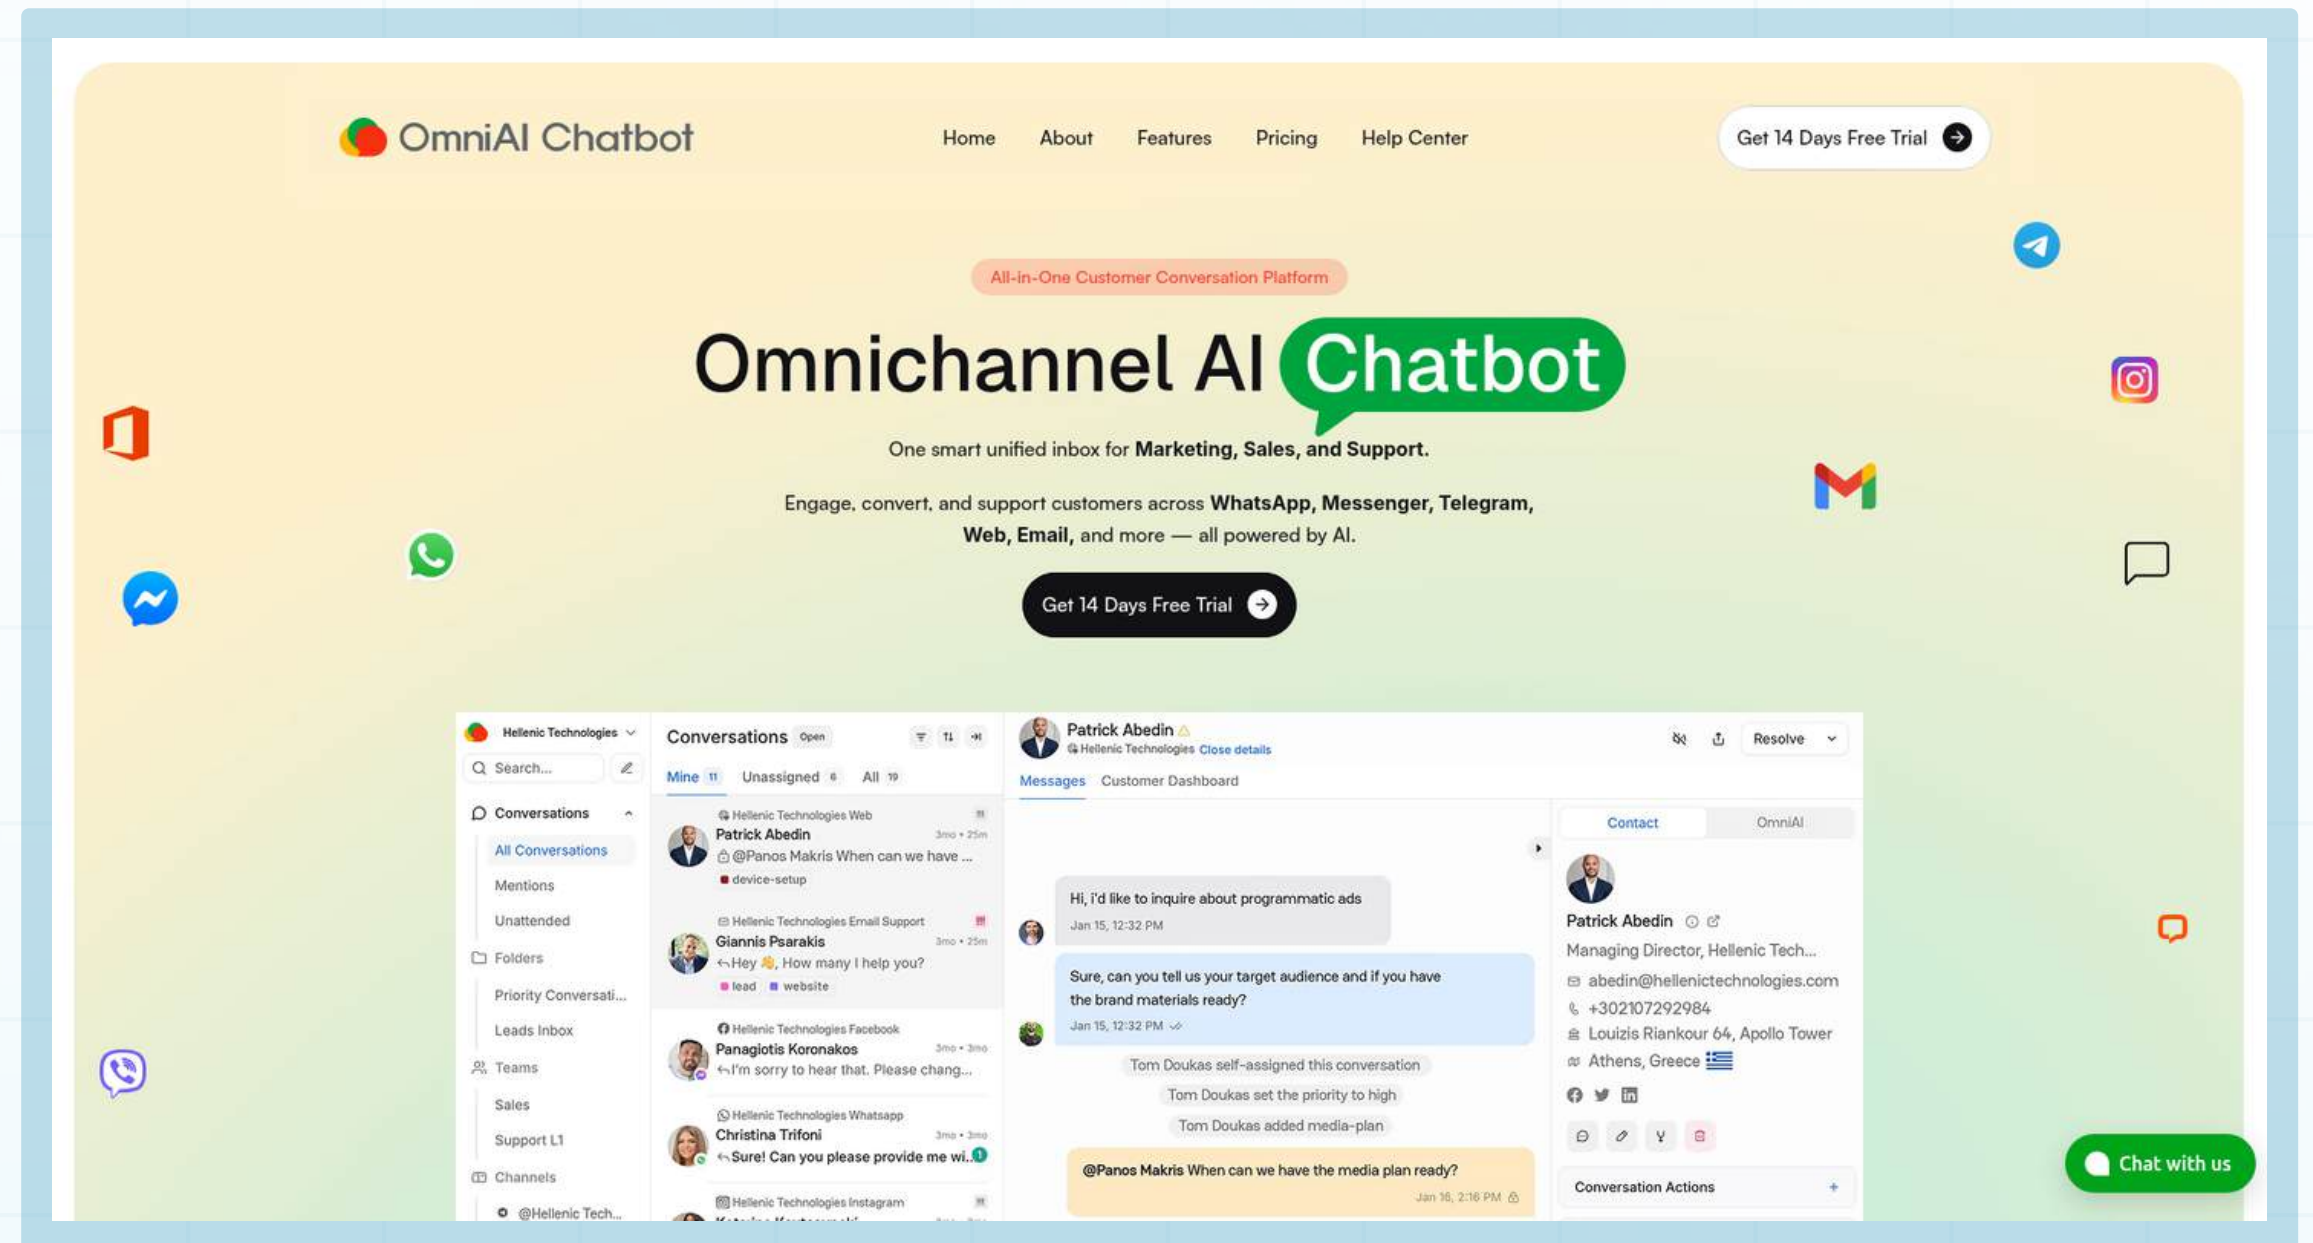

- Unified inbox for WhatsApp, Instagram, Email & more.
- AI replies with sentiment detection & smooth handoffs.
- Shopify integration for orders, carts & product sync.
- Mobile apps, analytics & automation for support teams.

Technology Stack:

- Frontend: React.js
- Backend: Node.js, Python
- Database: PostgreSQL, MongoDB, Redis
- AI Stack: LLMs, Dialogflow3
- E-commerce Integration: Shopify API

Link:

- <https://omniaichatbot.com/>

Servicenow Dashboard

Features:

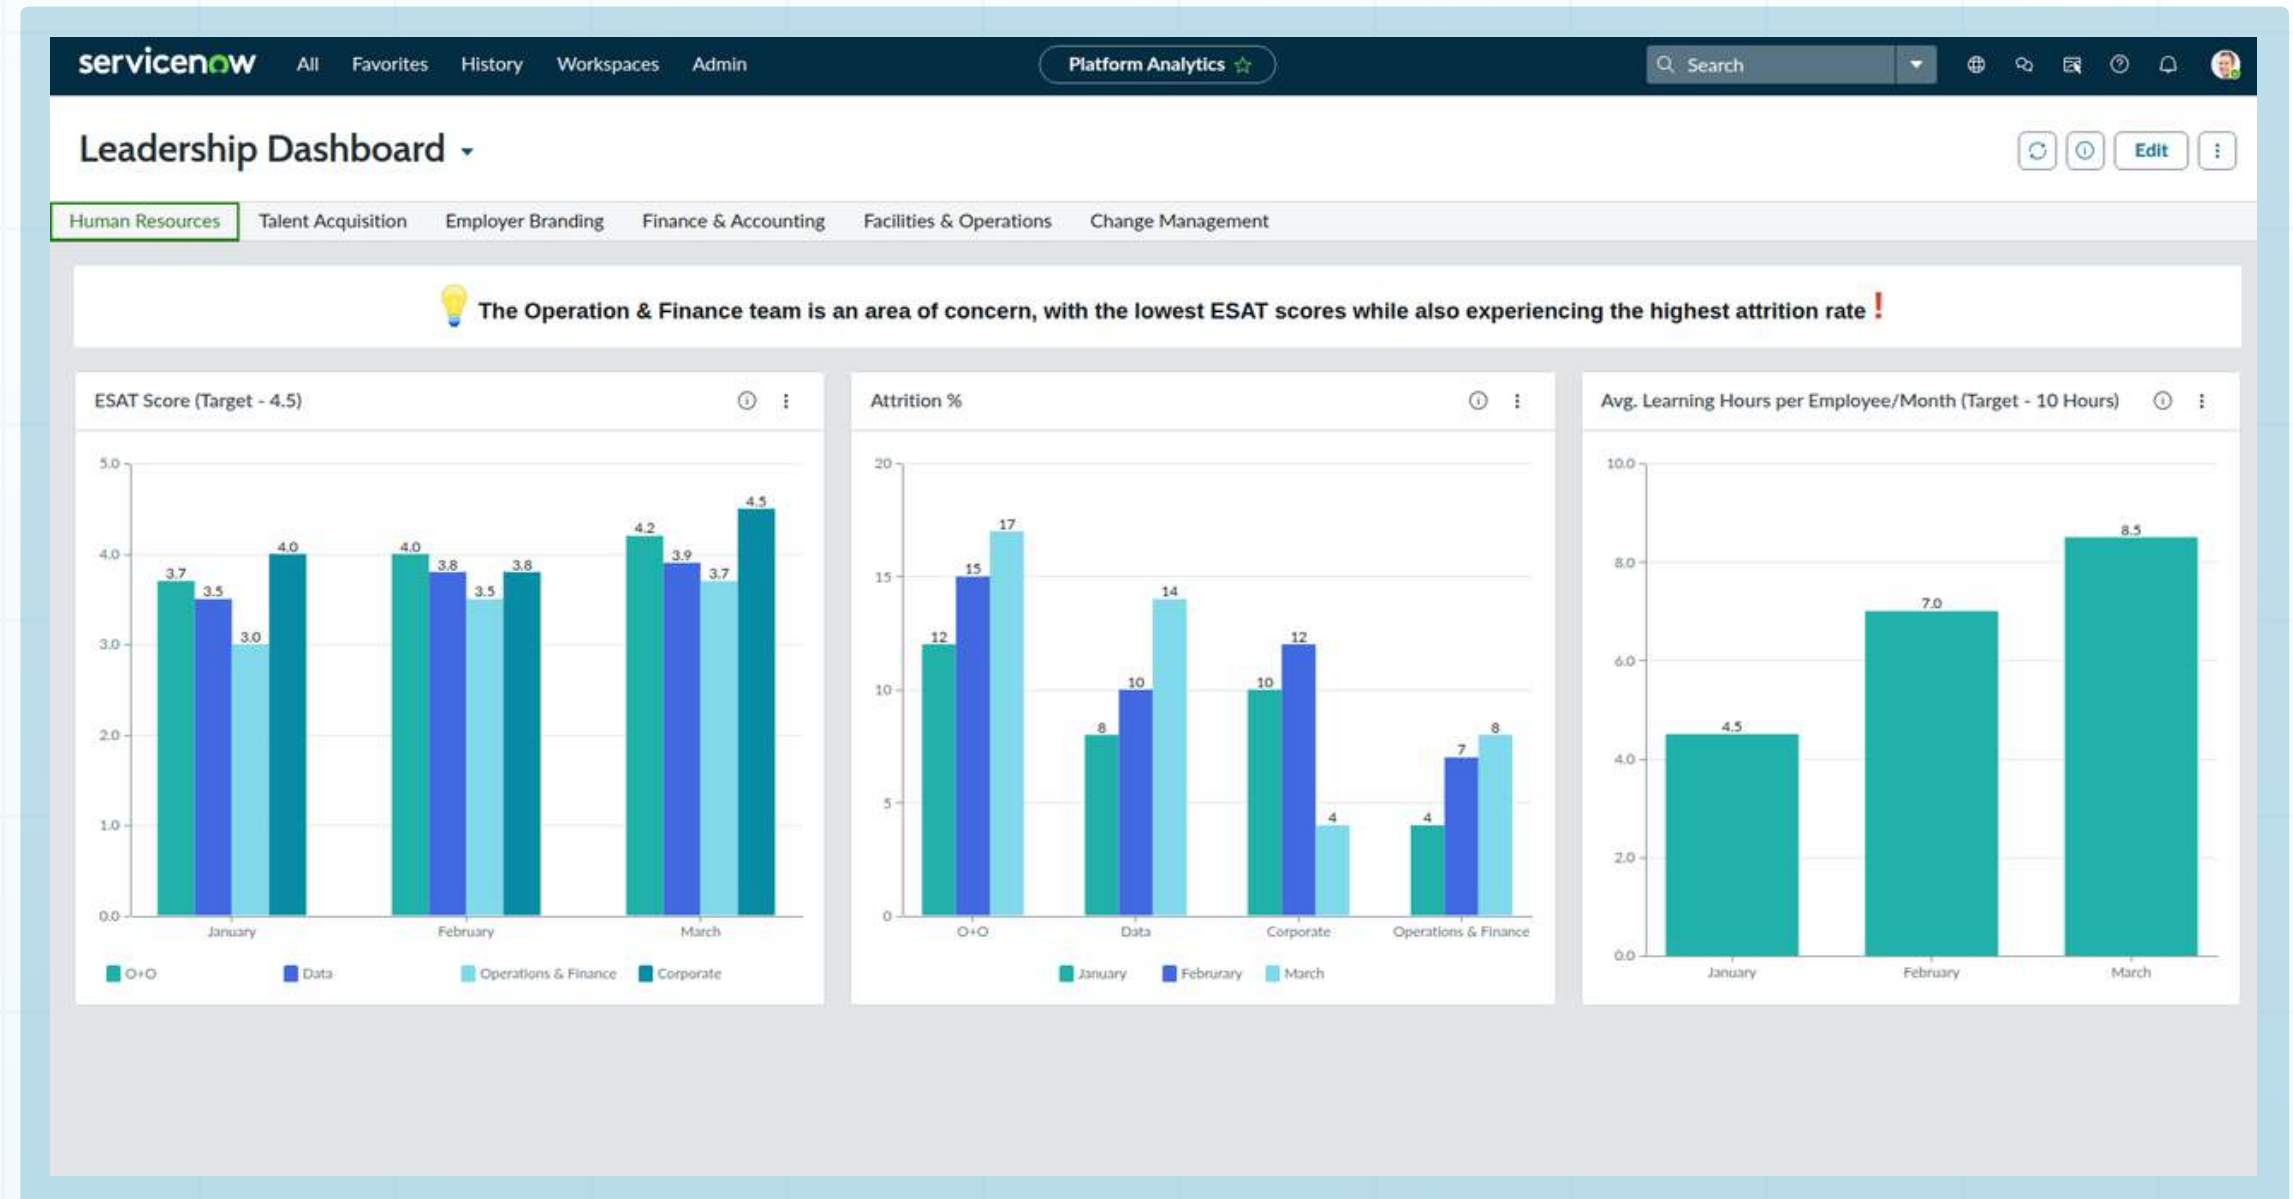

- Real-time insights with customizable widgets and KPI tracking.
- Interactive analytics for IT, HR, and business operations.
- Automated reporting and alerts to monitor performance and incidents.
- Role-based views for personalized dashboards and data access control.

Technology Stack:

- Reporting & Analytics: Performance Analytics, real-time widgets, and dashboard KPIs
- Cloud Infrastructure: Hosted on ServiceNow-managed cloud (multi-tenant, scalable)

Link:

- <https://www.servicenow.com/>

LandBot ChatBot

Features:

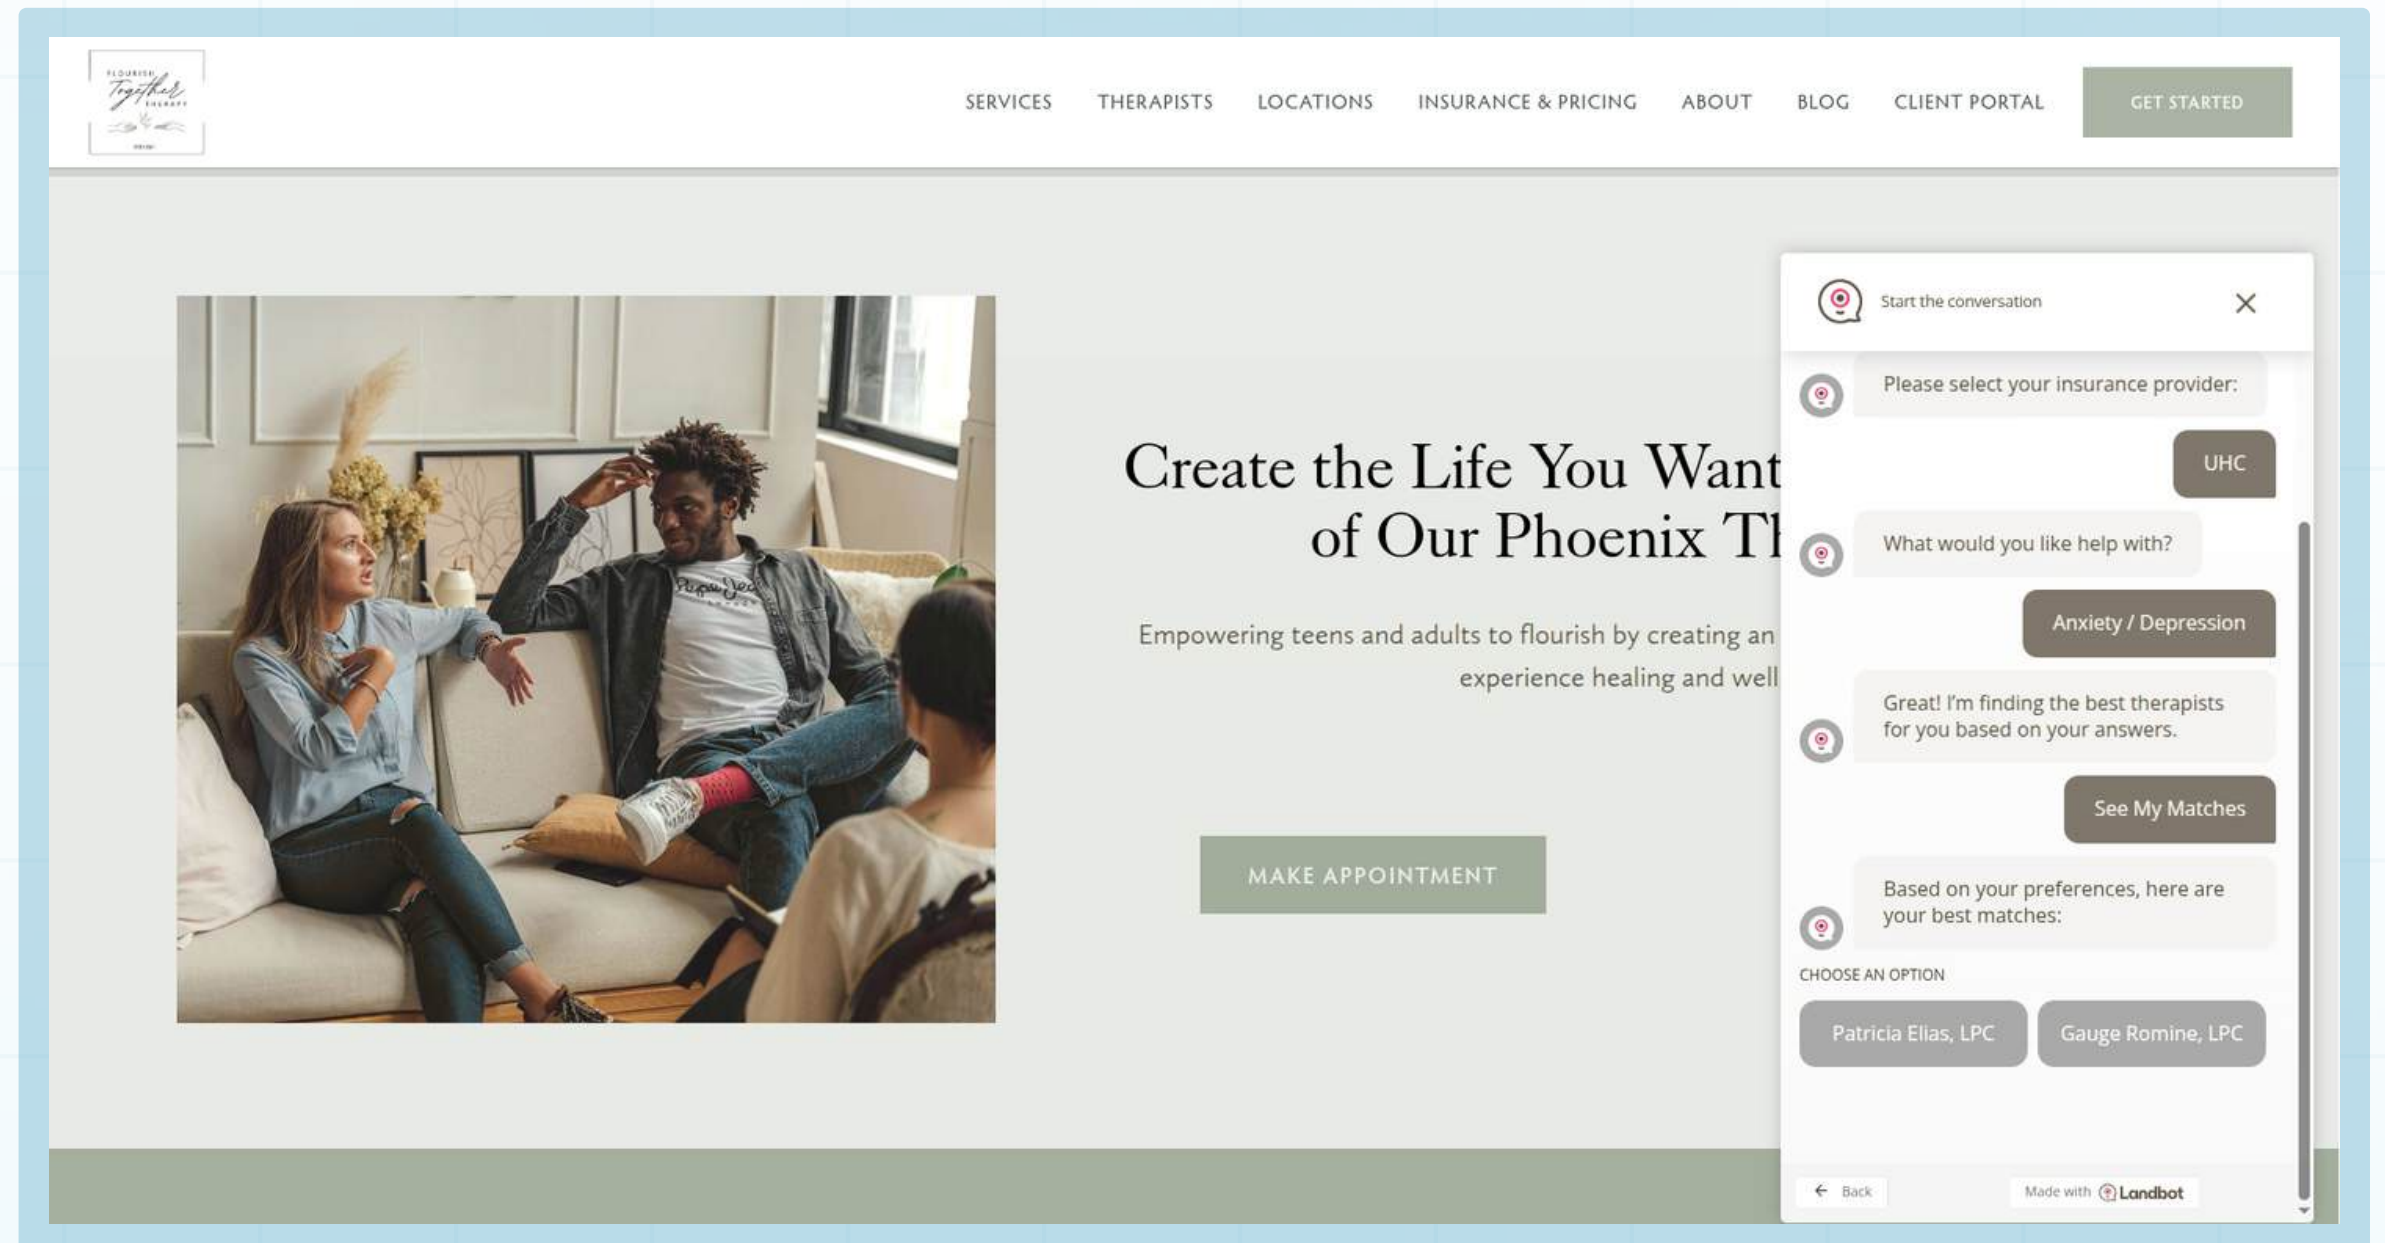

- Book Appointments via Chatbot
- View Matching Therapists.
- Browse Insurance Providers.
- Access Location Information.
- Integrate with Asana & Zapier.

Technology Stack:

- Landbot
- Asana
- Zapier

Link:

- <https://www.flourishtogethertherapy.com/>

Client Feedback

I take pride in delivering high-quality AI and backend solutions that drive efficiency and innovation. My clients consistently appreciate my expertise, timely delivery, and ability to tackle complex challenges.

Landbot Expert Needed to Build Therapist Matching Agent
★★★★★ 5.0 | Feb 27, 2026 - Mar 27, 2026

"Shyam did an excellent job on our Landbot project. He completed the build quickly and with strong technical precision, ensuring everything functioned exactly as intended. His communication was clear, proactive, and thorough throughout the process, which made collaboration smooth and efficient. He also took time to meet with me post project to ensure I understood how implement it and track leads. I appreciated his attention to detail and reliability, and I hope to hire him again for future projects." [less](#)

Why Work with me?

- ✓ 8+ years of industry experience
- ✓ Expert in AI, backend engineering, and cloud solutions
- ✓ Proven track record of delivering scalable and innovative solutions
- ✓ Hands-on expertise in AI-driven automation and backend optimizations
- ✓ Strong portfolio of healthcare, legal, hiring, and compliance platforms
- ✓ Deep understanding of cloud architectures, security, and API integrations
- ✓ Proficient in DevOps practices, CI/CD pipelines, and system monitoring

Thank You
